-  **800,000+** Satisfied Customers

### QUESTION 1

When deploying an Eval Next-Generation Firewall (NGFW) within a customer environment for the purpose of generating a Security Lifecycle Review (SLR) report, creation of which interface will not impact production traffic?

- A. Layer 3 interface
- B. SLR interface
- C. virtual wire interface
- D. TAP interface

Correct Answer: D

---

### QUESTION 2

Which traffic will be blocked when application-default service is set on a Security policy?

- A. SSH traffic on TCP/22
- B. HTTPS traffic on TCP/443
- C. HTTP traffic on TCP/81
- D. DNS traffic on UDP/53

Correct Answer: C

---

### QUESTION 3

Which architecture is unique to Palo Alto Networks and results in no additional performance overhead when enabling additional features?

- A. multi-pass
- B. multiple-core threaded
- C. single-pass
- D. no-pass

Correct Answer: C

---

### QUESTION 4

What is a technical benefit of User-ID in relation to policy control?

- A. It matches traffic against policy to check whether it is allowed on the network.

- B. It allows all users to designate view-only access to itinerant personnel.
- C. It improves safe enablement of applications traversing the network.
- D. It encrypts all private keys and passwords in the configuration.

Correct Answer: B

---

#### QUESTION 5

A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- A. The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- B. Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- C. There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- D. Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

Correct Answer: C
