QUESTION 1

At the end of the eighth Sprint, the internal sponsors are upset and angry with the progress of the product being built. The current state of the product is not as expected and will require additional Sprints and more budget than originally anticipated at the start of the project.

What factors may have led to this? (Choose three.)

- A. The Product Owner has not been engaging with sponsors frequently enough and has not been kept aware of the overall progress of the project.
- B. The sponsors haven't been using the Sprint Reviews to actively engage, and inspect and evaluate progress.
- C. The scope changes have not been tracked adequately and the change request process has not been followed properly.
- D. The stakeholders have not been using the Daily Scrum effectively to track the Development Team's progress.
- E. The Scrum Master has not ensured transparency.
- F. The project plan proposed to the sponsors at the start of the project followed stringently.

Correct Answer: ABE

One of the principles of agility includes working closely with business people. In order to manage stakeholder expectation, there must be open communication (through collaboration and transparency) throughout the project cycle. This maximizes alignment, helps with making business decisions, and reduces risk.

Although, the Scrum Guide does not directly state that the Scrum Master is responsible for ensuring transparency it is implicit. The Scrum Master is responsible for the process in which Scrum is adopted and enacted. Scrum is founded on empiricism and the Scrum Master helps those inside and outside the team work in an empirical environment which includes transparency (one of the three pillars of empiricism).

QUESTION 2

Which role would know the most about the progress toward a business objective or a release, and be able to explain clearly the alternatives?

- A. The Product Owner
- B. The Release Manager
- C. The Development Team
- D. The Scrum Master

Correct Answer: A

QUESTION 3

Which role is responsible for determining when it is most appropriate to update the Sprint Backlog?

- A. The Product Owner
- B. The Development Team
- C. The Scrum Team
- D. The Scrum Master

Correct Answer: B

The Development Team is responsible for tracking the remaining work of the Sprint.

QUESTION 4

Stakeholders are only allowed to meet with the Scrum Team at Sprint Review.

- A. True
- B. False

Correct Answer: B

Getting feedback from Stakeholders is a crucial activity in Scrum. Working with stakeholders frequently ensures the team to focus on the right things to build. Although it is required to have Stakeholders at Sprint Review, they can also engage with the Scrum Team during Product Backlog Refinement, Sprint Planning or during the Sprint if the Scrum Team requires it.

QUESTION 5

The three pillars of empirical process control consist of:

- A. Planning, Inspection, Adaptation
- B. Inspection, Transparency, Adaptation
- C. Planning, Demonstration, Retrospective
- D. Respect For People, Kaizen, Eliminating Waste

Correct Answer: B

These three pillars uphold every implementation of the empirical process control. Without them, Scrum cannot be implemented as intended.
