QUESTION 1

A customer has specific steps/tasks that need to be performed every time a new Business License Application comes in. The following actions must be completed:

1.

The applicant must upload an image of their driver's license

2.

The license reviewer must perform a background check within five business/working days

3.

The license reviewer must enter the background check results into an external system manually within two business days of completing the background check

4.

The license reviewer must provide a recommendation to the approver to approve/reject the application and submit it for review

5.

The license reviewer may add additional steps/tasks for a particular application as needed

Which statement is true regarding Action Plan Templates relative to the business requirements above?

A. An action plan template can be created (or the business license application object, and a document checklist item for the Image upload can be created

B. The reviewer users cannot create their own tasks within a predefined action plan template

C. Action plans cannot have tasks with due dates dependent upon prior tasks within the action plan

D. A document checklist item for an action plan template cannot be created

Correct Answer: A

An action plan template can be created for the business license application object, and a document checklist item for the Image upload can be created is a true statement regarding Action Plan Templates relative to the business requirements above. An action plan template is a predefined set of tasks and subtasks that can be applied to records such as cases or permits. An action plan template can be created for any custom or standard object that supports activities, such as the business license application object. A document checklist item is a type of task that can require users to upload documents or images as part of an action plan template.

QUESTION 2

A public sector agency recently implemented Public Sector Solutions for license and permit use cases. The agency is now planning to get certified for ISO 27001 compliance. One of the essential requirements for achieving this certification

is demonstrating that enhanced security, data protection, and auditing capabilities are in place for their implementation.

What Salesforce add-on product should a technical consultant recommend for the agency's compliance use cases?

- A. Setup Audit Trail
- B. Field History Tracking
- C. Salesforce Shield
- D. Classic Encryption

Correct Answer: C

Salesforce Shield is a Salesforce add-on product that can be used for the agency's compliance use cases. Salesforce Shield provides enhanced security, data protection, and auditing capabilities for the agency's implementation. It includes three features: Platform Encryption, Event Monitoring, and Field Audit Trail. Platform Encryption allows the agency to encrypt sensitive data at rest while preserving critical platform functionality. Event Monitoring allows the agency to track and audit user activity and performance across the platform. Field Audit Trail allows the agency to track changes to sensitive data fields over time and set retention policies for field history data. QUESTION 3

A public sector agency implemented Public Sector Solutions for meeting licensing, permitting, and inspection requirements. The inspection team has requested to make a few changes to the existing inspection form. The System Administrator is unable to see the "Edit" button for the Action Plan template and hence unable to make any changes.

What could be the reason for this?

- A. Edit option needs to be added to Action Plan template page layout
- B. System Administrator doesn't have "Edit" permissions to Action Plan template
- C. Once published, an Action Plan template cannot be changed.
- D. Action Plan template changes have to be requested to Salesforce support team

Correct Answer: C

Once published, an Action Plan template cannot be changed is the reason why the System Administrator is unable to see the "Edit" button for the Action Plan template. An Action Plan template is a predefined set of tasks and subtasks that can be applied to records such as cases or permits. Once an Action Plan template is published, it becomes read-only and cannot be edited or deleted. To make changes to a published Action Plan template, the System Administrator needs to clone it and create a new version of it.

QUESTION 4

A Technical Consultant has been asked to give insight to the reviewers explaining how a particular grant seeker was prioritized now that the Prioritization Expression Sets and Matrix have been developed.

Which three tasks must the Technical Consultant do to accommodate this request?

- A. Create a Screen flow and incorporate the Decision Explainer component to display the outcome.
- B. Create an Apex Trigger to document the decision steps performed.
- C. Add the Decision Explainer Log History component to the Lightning record page(s).
- D. Integrate the BRE with Decision Explainer.
- E. Assign the Decision Explainer Permission Set License to the appropriate user(s).

Correct Answer: ACE

A Screen flow, a Decision Explainer Log History component, and a Decision Explainer Permission Set License are three tasks that must be done to accommodate the request of explaining how a particular grant seeker was prioritized. A Screen flow is a type of flow that can create an interactive user interface to display information or collect data from users. A Screen flow can incorporate the Decision Explainer component, which is a custom Lightning component that can display the outcome and explanation of a decision made by a Decision Matrix or a Business Rules Engine (BRE). A Decision Explainer Log History component is a standard Lightning component that can display a list of Decision Explanations that have been generated for a record by a Decision Matrix or a BRE. A Decision Explainer Permission Set License is a type of license that can grant users access to the Decision Explainer features, such as viewing and creating Decision Explanations.

QUESTION 5

A government agency recently migrated to Salesforce and is very excited to be on board, but their System Administrators have doubts about installing the Omnistudio package.

Which three tasks must be completed or checked before installing the Omnistudio Package?

- A. Enable Orders
- B. Enable Assets
- C. Enable Person Accounts
- D. Ensure the email deliverability access level is set to "All email"
- E. Confirm browser settings meet published minimum requirements

Correct Answer: BCD

Enabling Assets, enabling Person Accounts, and ensuring the email deliverability access level is set to "All email" are three tasks that must be completed or checked before installing the Omnistudio Package. Assets are records that represent products or services sold to customers. Assets must be enabled to use some features of Omnistudio, such as FlexCards or DataRaptors. Person Accounts are records that store information about individual people who are not associated with a business account. Person Accounts must be enabled to use some features of Omnistudio, such as OmniScripts or DataPacks. Email deliverability access level determines what types of email can be sent from Salesforce. The email deliverability access level must be set to "All email" to install Omnistudio Package successfully.
