QUESTION 1

A government agency is responsible for providing licenses to various sporting events. To acquire the license, individuals need to pay the required fees. The System Administrator for Public Sector Solution main responsibility is to automatically map and set the fees for each application to ensure the correct fees are mapped.

Which Business Rules Engine tool is used here?

- A. Workflow Field Updates
- B. Data matrices
- C. Process Builder
- D. Decision Matrices

Correct Answer: D

Decision Matrices are Business Rules Engine tools that are used to automatically map and set the fees for each application. A Decision Matrix can evaluate answers based on rules and conditions and provide a decision outcome and explanation. For example, a Decision Matrix can determine the fee amount based on the type of license, the city and county location, the volume of current business, and the size of the building. QUESTION 2

Bobahaven wants to implement the Grants Management module of Public Sector Solutions. They would like to allow constituents to apply online for grants and check the progress of grant applications. The Chief Marketing Officer and Head of Constituent Services have expressed their concerns about the security of the solution. They want to ensure they comply with privacy regulations around the storage and use of constituent's data, and they are wondering how to protect against bots potentially spamming the application forms.

What should the Technical Consultant suggest to Bobahaven to protect the application forms?

- A. Enable the Salesforce Spam Check for Experience Sites.
- B. Deploy grant application OmniScripts on Bobahaven's Experience Site pages set to "Requires Login."
- C. Provide constituents with a search page on Bobahaven's website to look up application reference numbers and check the applications progress.
- D. Implement spam checking for Bobahaven's Experience Site forms using CAPTCHA.
- E. Set the external organization-wide default sharing settings for grant applications objects to Private.

Correct Answer: DE

Implementing spam checking for Bobahaven's Experience Site forms using CAPTCHA can help prevent bots from submitting fake or malicious grant applications. CAPTCHA is a feature that requires users to prove that they are human by solving a simple challenge before submitting a form. Setting the external organization-wide default sharing settings for grant applications objects to Private can help protect the privacy of the constituents' data. This means that external users cannot see any grant applications by default, unless they are explicitly shared with them. QUESTION 3

The Department of Disaster Assistance has received the approval to fund government agencies if a disaster occurs in their region.

what is the best solution to capture the fund-related requirements, objectives, and supporting documents?

- A. Utilize the Funding Program Request object to capture the details
- B. Utilize the "Funding Program" object to capture the details
- C. Utilize the "Funding Request" object to capture the details
- D. Utilize the "Business Licence Application" object to capture the details

Correct Answer: C

The "Funding Request" object is the best solution to capture the fund-related requirements, objectives, and supporting documents. The "Funding Request" object is a standard object that comes with Public Sector Solutions. It can be used to track requests for funding from different sources, such as government agencies or external organizations. The "Funding Request" object can store information such as the funding program, the funding amount, the funding status, the funding requestor, and the funding recipient. It can also have related records such as documents, tasks, or disbursements. Reference:

QUESTION 4

What are the three different key modules of Public Sector Solutions: Business Rules Engine?

- A. Expression Maps
- B. Expression Sets
- C. Decision Table
- D. Decision Matrix
- E. Decision Tree

Correct Answer: BCD

Expression Sets, Decision Table, and Decision Matrix are three different key modules of Public Sector Solutions: Business Rules Engine (BRE). Expression Sets are modules that can define expressions that can be reused across multiple rules or matrices. Decision Table is a module that can evaluate data based on rows of conditions and actions in a tabular format. Decision Matrix is a module that can evaluate data based on columns of conditions and outcomes in a tabular format. QUESTION 5

A government agency recently implemented Inspections Management, but the internal users want an easier way to

generate Visits. Currently, the users must navigate to the Related List tab on an Application, scroll to the Visits* related list and click 'New.' The users also have to manually fill all of the fields when creating the Visit record. What is the recommended approach for creating a better user experience when creating a Visit?

- A. Change the Business License Application and Individual Application pages to have a single related list of Visits on the right panel.
- B. Create a Screen Flow with the required fields to create a Visit record and add the button to launch the flow on the page layout.
- C. Advise the government agency that the current method is the best option available without custom code, which they should avoid wherever possible.
- D. Create a new Action on the Business License Application and Individual Application objects to create a Visit record with Predefined Field Values.

Correct Answer: B

Creating a Screen Flow or creating a new Action are two possible approaches for creating a better user experience when creating a Visit. A Screen Flow is a type of flow that can create an interactive user interface to display information or collect data from users. A Screen Flow can have the required fields to create a Visit record and it can be launched by a button on the page layout. An Action is a type of button that can perform tasks such as creating or updating records. An Action can have Predefined Field Values that can automatically populate fields when creating a Visit record.
