### QUESTION 1

A user needs to upgrade a published app in the Finance stream. After the changes have been made, the app needs to be moved to the Accounting stream. The user has access to a laptop running Windows 7 (32-bit). The owner of all published apps in the sa\_repository user.

Which steps should a system administrator take to efficiently complete this task?

A. 1. Change the app owner to the user to make changes

2.

Add the Accounting tag to the app

3.

Move the app to the Accounting stream

B. 1. Give the user permissions to make changes to the app

2. Move the app to the Accounting stream

C. 1. Export the app to a location for the user to make the changes using Qlik Sense Desktop

2.

Import the app back using QMC after the changes have been made

3.

Publish the app to the Accounting stream

D. 1. Change the app owner to the user to make changes

2. Move the app to the Accounting stream

Correct Answer: B

---

### QUESTION 2

A system administrator has to set up three physical servers and one virtual server for a new Qlik Sense

Enterprise environment. Four separate nodes are required.

The physical servers have 32 GB of RAM. The virtual server has 8 GB of RAM.

Which node should be virtualized?

A. Proxy

B. Scheduler/Reload

C. Central

D. Engine

Correct Answer: D

### QUESTION 3

The screenshot shows the Qlik Sense Audit console interface. At the top, there are tabs for 'Start', 'Help', and 'Administrator'. Below these are 'Audit', 'Audit security rules', 'Auto-audit', 'Clear all filters', and 'Privileges to audit'. The 'Audit' section is active, showing a search for 'Streams' with 1 result and 'Users' with 1 result. The environment is set to 'Both in hub and QMC'. A table displays the audit results for Chris Rogers, showing a 'Transpose' action on the 'Accounting' stream. The 'Source user' is Chris Rogers, and the 'Target resource' is Accounting. The 'R U D P' (Read, Update, Delete, Privilege) columns are highlighted in green, indicating that Chris Rogers has full access to the Accounting stream.

Refer to the exhibit.

An administrator creates this security rule to deny Chris Rogers access to the Accounting stream:

```
((user.name!="Chris Rogers"))
```

After conducting an audit on the Accounting stream, the administrator notices that Chris Rogers can still access the Accounting stream.

What is causing this issue?

- A. The resource filter fails to include App\_\* to deny access for Chris Rogers
- B. Another security rule is allowing Chris Rogers read access
- C. The security rule contains incorrect syntax for Chris Rogers
- D. The synchronization for Chris Rogers has NOT been completed

Correct Answer: A

### QUESTION 4

A system administrator must make sure that only members of the "Dev" Active Directory group have the Work stream and are able to create Qlik Sense apps.

The administrator creates a security rule that only allows members of the "Dev" group to create apps, but other users can still see the Personal Work area and are able to create apps.

What is the cause of this issue?

- A. The security rules are corrupted
- B. The default security rule for app creation is enabled
- C. The Create app functionality is disabled for "Dev" group
- D. Security rules do NOT impact the Work stream

Correct Answer: A

---

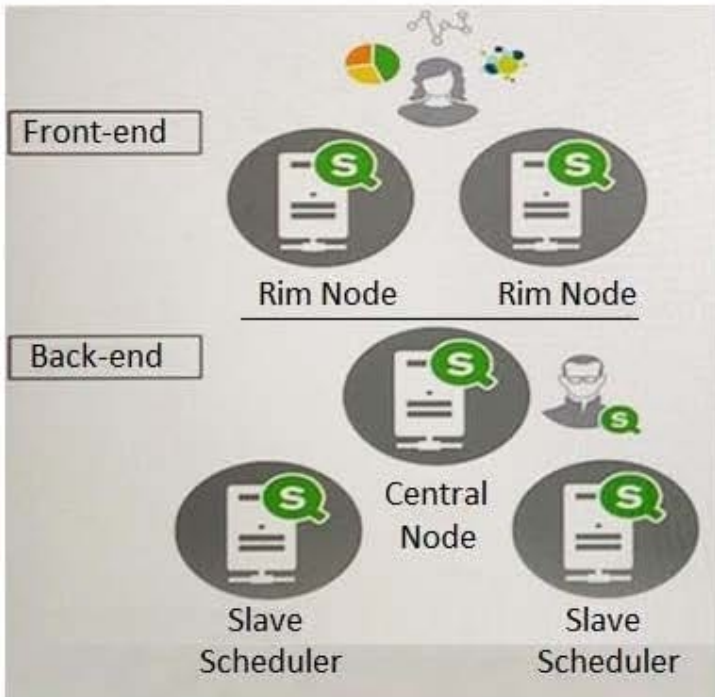

#### QUESTION 5

A system administrator must design a Qlik Sense server architecture that meets the following requirements:  
Approximately 1000 users will be using apps  
Apps are reloaded outside of office hours  
The total size of data in all apps will be approximately 600 million rows  
Apps must be available 24/7

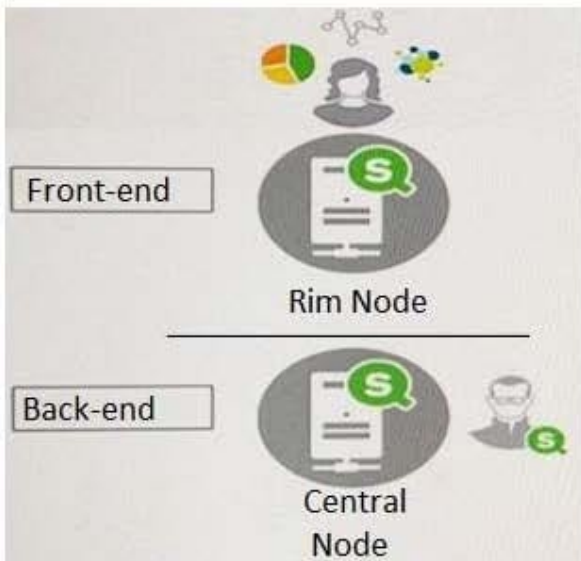

Which architecture meets these requirements in the most cost efficient way?

A.

B.

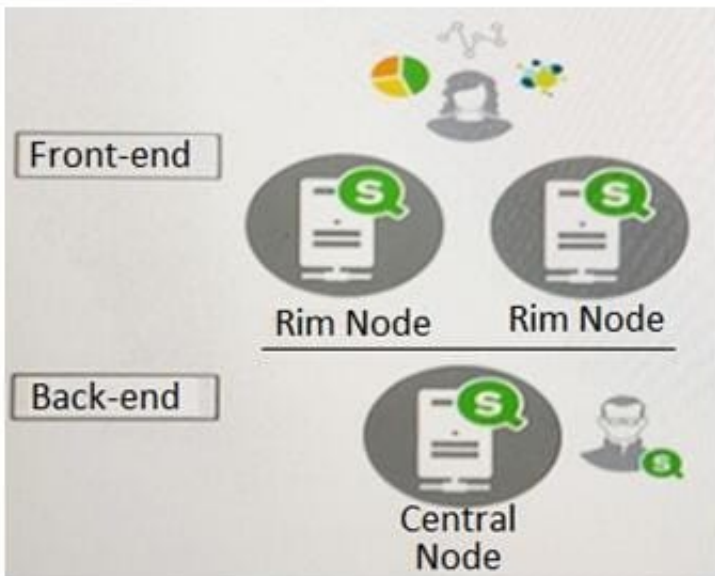

C.

D.

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D
