QUESTION 1

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration: Opens all necessary ports Checks in MMC that there is a personal certificate on the server Creates a DNS entry for an easier URL Tries to connect with various Internet browsers on different machines including mobile devices Adds the page to trusted sites in the Internet configurations Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

A. 1. Generate a valid certificate for organizational needs using OpenSSL

2.

Add the certificate to the personal certificate store of the Qlik Sense Service User

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

B. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)

2.

Add the certificate to the personal local computer certificate store

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

C. 1. Acquire a third-party certificate from a trusted root certificate authority (CA)

2.

Add the certificate to the personal certificate store of the Qlik Sense Service User

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

D. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key

2.

Add the certificate to the personal local computer certificate store

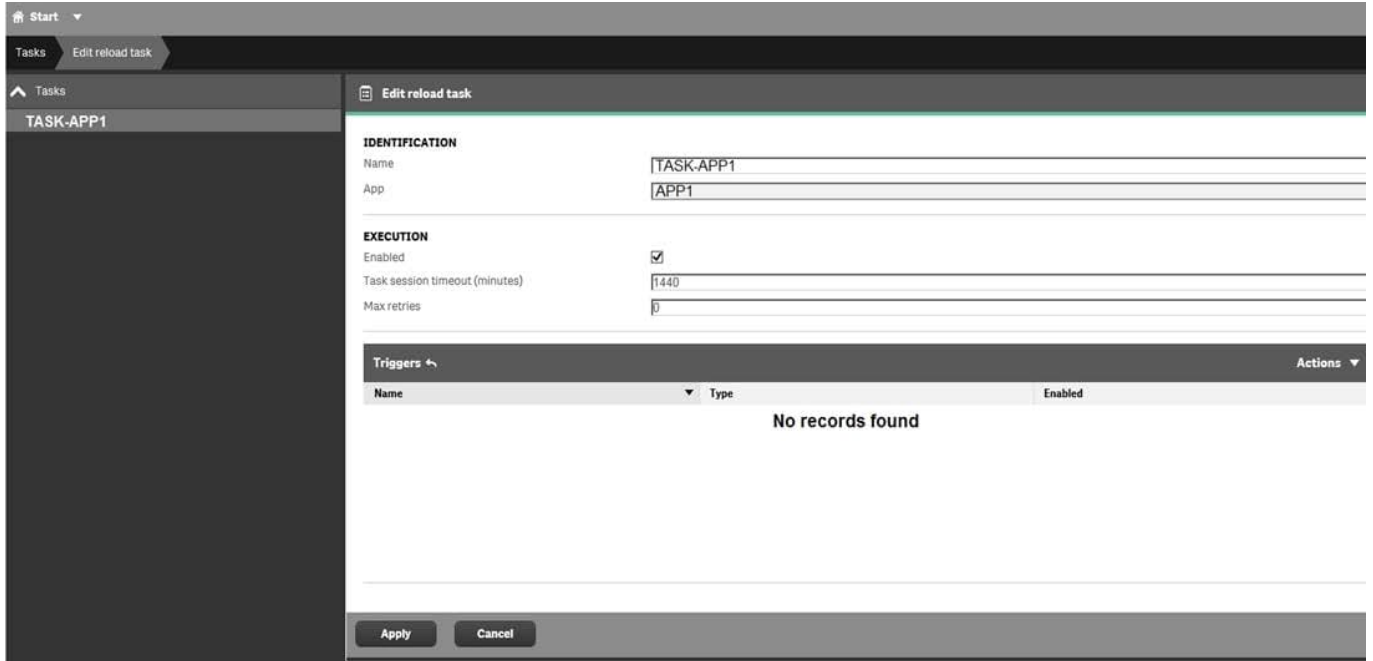

3.

Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

Correct Answer: C

QUESTION 2

Refer to the exhibit.

What is the result when the administrator selects the Start button for TASK-APP1 in the Task screen?

- A. A prompt will appear to create a trigger
- B. TASK-APP1 will start but eventually fail
- C. TASK-APP1 will run successfully
- D. TASK-APP1 will run continuously

Correct Answer: C

QUESTION 3

Refer to the exhibit.

One user can see an extension, but another user can NOT see the same extension. The system administrator reviews the extension in the QMC.

What is causing this issue?

- A. The user has NOT imported the extension
- B. The security rule is set to QMC only
- C. The user does NOT have the Content Admin role
- D. The user is NOT the owner of the extension

Correct Answer: C

QUESTION 4

A system administrator needs to troubleshoot an issue reported with Qlik Sense. The administrator confirms the following: NO hardware issues exist NO other processes are affecting Qlik Sense NO other systems report any issues The network team reports optimal performance

The system administrator decides to check the task execution details and token allocations.

Which two tools should the system administrator use? (Choose two.)

- A. Log Monitor
- B. Sessions Monitor
- C. Operations Monitor
- D. Reloads Monitor
- E. License Monitor

Correct Answer: DE

QUESTION 5

A company recently experienced a merger and needs to integrate new users into the Qlik Sense environment.

A system administrator must make sure that the system sizing and the tokens match the requirements for all employees in the future.

The system administrator learns the following information: 450 active Qlik Sense users before the merger 300 new Qlik Sense users 500 current token licenses Reloads must have the same performance as before the merger The number of apps will approximately double

Management requests an estimate from the system administrator about server resources and additional licenses.

Which set of tools should the system administrator use to meet these requirements?

- A. Performance Monitor, Reloads Monitor, Scalability Tools, and License Monitor
- B. Performance Monitor, License Monitor, Operations Monitor, and Scalability Tools
- C. Performance Monitor, Reloads Monitor, QlikCockpit, and License Monitor
- D. Performance Monitor, Reloads Monitor, Operations Monitor, and Scalability Tools

Correct Answer: B
