QUESTION 1

A company decides to move servers from on premise to a cloud. A system administrator performs a backup, restore, and brings the server online. When users open the app on the hub, they get an error message indicating the app could not be found.

The system administrator confirms that apps are present in the required location and NO changes have been made.

What could be causing the issue?

- A. Shared persistence path is NOT reachable
- B. Synchronized persistence is in place
- C. The app has been moved from one stream to another
- D. The security rules were broken when the servers were migrated

Correct Answer: A

QUESTION 2

A customer uses Qlik Sense Enterprise v3.2 SR5 and wants to upgrade to the latest version. Qlik Sense Enterprise is running on Microsoft Windows Server 2008 R2.

Which option should the system administrator recommend?

- A. Run Microsoft Windows Updates to prepare Windows Server 2008 R2 for the latest Qlik Sense version
- B. Download the latest patch, Qlik_Sense_update.exe, and install it using Windows compatibility mode
- C. Upgrade to Microsoft Windows Server 2012 or later
- D. Upgrade only up to the Qlik Sense February 2018 version

Correct Answer: B

QUESTION 3

A system administrator is installing and configuring a new Qlik Sense deployment. The system administrator completes the following steps: Makes sure the IT-provisioned server, named Server1, meets the required specifications Installs Qlik Sense on Server1 Tests the installation by opening Qlik Sense from the server desktop shortcut Modifies default virtual proxy prefix to "qliksense" Creates a new virtual proxy for users with a prefix of "QSE" Links the new virtual proxy to the central proxy Configures the new virtual proxy to load balance with the central node Configures the new virtual proxy host white list with the server name, FQDN, and server IP address

When the system administrator tests the new virtual proxy using the URL, <http://Server1/sense/hub>, this error message displays:

Error 404 The requested resource cannot be found

What is causing this error?

- A. The new central proxy was NOT created
- B. The incorrect virtual proxy was used in the test
- C. The new virtual proxy is configured incorrectly
- D. The central proxy was NOT configured correctly

Correct Answer: C

QUESTION 4

A Qlik Sense environment uses user-based license types. A user, who can typically create new apps in Personal Work, can no longer create new apps. The personal Work area is NOT displayed for this user.

How should the system administrator resolve this issue?

- A. In License Management, verify that Analyzer access rules applies to this user
- B. In License Management, verify that Professional access rules applies to this user
- C. In Users, look up the user and verify that this user is assigned the ContentAdmin role
- D. In Audit, select Audit license rules, and verify there are no rules for this user

Correct Answer: D

QUESTION 5

A data architect creates an app in Qlik Sense Desktop with an ODBC data connection from Apache Hive using a single sign-on solution (SSO). When the app is published in the hub, the data connection fails.

A system administrator tests the login credentials for the ODBC connection on the server and is able to access the database. Why does the data connection fail?

- A. Qlik Sense Desktop is NOT allowing Qlik Sense server to use Apache Hive
- B. The data architect's account is NOT assigned the RootAdmin role
- C. The service account user is NOT part of the SSO solution in Apache Hive
- D. The Qlik Sense server does NOT support ODBC connections with Apache Hive

Correct Answer: C
