### QUESTION 2

At Rusty Springs Ltd, a new online order system is being designed for its registered customers. Each customer has an account, allowing them to order from a pre-populated form containing details of their purchases in the previous three months. The customer simply ticks which previous purchases they would like to re-order, confirms delivery details and approves the purchase. A Rusty Springs administrator updates the purchase details on the system on a monthly basis and the sales manager gets an automated order from the system within two hours of the purchase.

A business analyst has written a use case entitled '\\Key Customer Purchases Springs\\', which includes the following lines:

- A) The customer has logged onto the system and wishes to purchase springs.
- B) The customer adds a new product code onto the system.
- C) Only the registered customer can make an order.
- D) The system returns the previous purchases.

Which of the following is correct?

- A. A) Is a precondition; the sales manager is the actor.
- B. A) Is the trigger; C) is a line from the security section.
- C. B) Is a line from the basic flow; the customer is the actor.
- D. D) Is a line from the alternative flow; this is a system level use case.

Correct Answer: B
