QUESTION 1

One of the requirements of a new accounts management system is that it must allow users to scale the size of text on the screen. The requirement states that the text can be reduced to 10% of normal size and increased up to 500% of normal size, depending on the preference of the user.

What would this requirement be classified as?

- A. Functional requirement
- B. General requirement
- C. Non-functional requirement
- D. Technical requirement

Correct Answer: B

QUESTION 2

A project team has decided that it wishes to adopt an agile/iterative approach to a development project.

The following principles have been agreed upon to guide the selection of elicitation techniques:

- 1) We will embrace the evolutionary and re-factoring principles of iterative development in our approach to requirements elicitation.
- 2) We need to build a broad (but basic) understanding of how teams work together in the current business situation.
- 3) We need to build strong personal relationships to ensure we can instil empowerment and collaboration in the team.

Which of the following sets of elicitation techniques would support all these principles?

- A. Interviews, prototyping, scenario analysis.
- B. Interviews, workshops, observation.
- C. Prototyping, scenario analysis, document analysis.
- D. Scenario analysis, observation, survey.

Correct Answer: B

QUESTION 3

A business analyst is allocating elicited requirements to an appropriate category in a requirements

catalogue. Here are five of the captured requirements:

- A) A sales person must be able to confirm a sales order.
- B) Only customers with a 'normal' status should be permitted to place orders.
- C) The order management system should hold the data for 'barred' customers for five years.
- D) A stock picker must be able to mark an order as 'picked'
- E) The order management team should be able to view sales orders by time range and status.

Which of these requirements will be classified as functional requirements in the requirements catalogue?

- A. A, B and C
- B. A, D and E
- C. B, C and D
- D. C, D and E

Correct Answer: A

QUESTION 4

Below is a requirements list for a taxi company's booking system:

REQ#1: The system must allow the operator to make and amend a taxi booking.

REQ#2: The system must allow the operator to delete a taxi booking.

REQ#3: The system must be available within standard working hours.

REQ#4: The system should support 100 concurrent booking requests between 06:00hrs and 23:30hrs.

REQ#5: The system should allow the operator to add a note when cancelling a taxi booking.

The following actions are being considered:

- A) Separate REQ#1 into 2 requirements.
- B) Clarify what is meant by 'standard working hours' in REQ#3.
- C) Check that the proposed solution will be able to support 100 concurrent booking requests, per REQ#4.
- D) Separate REQ#4 into 2 requirements.
- E) Review and merge REQ#2 and REQ#5.

Which of these actions should be undertaken to improve the clarity of these requirements?

- A. A, B and C
- B. A, B and E

C. A, D and E

D. C, D and E

Correct Answer: D

QUESTION 5

A project has been running at the Wield Engineering Company for six months. The requirements have been signed off and development is underway; however, the development team has hit a problem and cannot implement an approved requirement. The business analyst has been asked to discuss this with the requirement owner.

Before booking a meeting with the owner, the business analyst decides to check whether there are more requirements affected by this technical limitation.

What will help the business analyst discover other affected requirements?

A. Change control

B. Configuration control

C. Horizontal traceability

D. Vertical traceability

Correct Answer: D
