QUESTION 1

You have a server which is booting from a SAN. After adding new SAN storage to a host, the host will not boot from the SAN.

What will resolve this problem?

- A. LUN masking
- B. Persistent binding
- C. Trunking
- D. Multiplex binding

Correct Answer: B

QUESTION 2

A new server needs to start from LUN 1 instead of LUN 0. Which HBA setting must be configured?

- A. Selectable Boot
- B. Persistent Binding
- C. Enable Target Reset
- D. LUNs per Target

Correct Answer: A

QUESTION 3

Which protocol commonly uses CNA devices?

- A. FCIP
- B. iFCP
- C. FCoE
- D. FCR

Correct Answer: C

QUESTION 4

Your CTO is concerned over misuse of corporate storage assets because an employee was found to be hosting a music library on one of the SANs storage arrays. You have been instructed to provide some level of device security to the

corporate FC SAN. FC has a number of cost-effective (free) industry standard protection mechanisms that provide or restrict user access to SAN resources.

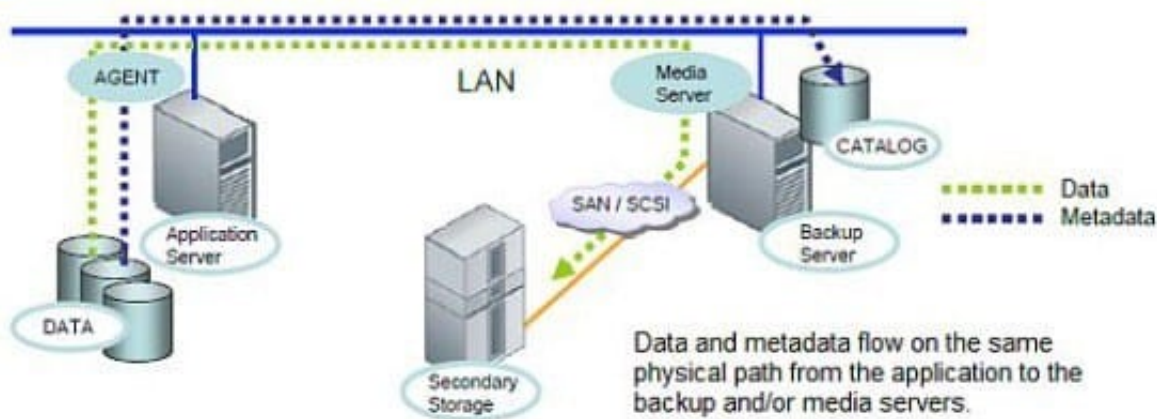

Which two FC provided mechanisms would you implement first? (Choose two.)

- A. LUN masking
- B. Device authentication and authorization
- C. Zoning
- D. Key management system

Correct Answer: AC

QUESTION 5

Click the Exhibit button.

Referring to the exhibit, which backup type is represented?

- A. Server-free backup
- B. Cloud backup
- C. LAN-free backup
- D. LAN backup

Correct Answer: D
