QUESTION 1

Data model transformation is a core service function that can be performed by proven technologies that have been around for years. Therefore, it is recommended that you look for opportunities to apply this technology wherever possible, especially in larger, more complex service compositions. Select the correct answer.

- A. True
- B. False

Correct Answer: B

QUESTION 2

Which of the following statements is true? Select the correct answer.

- A. WSDL definitions can use XML schemas to define the types used by WSDL input and output messages.
- B. WSDL definitions can use XML schemas to define the types used by WSDL input and output operations.
- C. WSDL definitions can use XML schemas to define the types used to establish the location used by service consumers to access the WSDL definitions.
- D. WSDL definitions cannot be used in conjunction with XML schemas.

Correct Answer: A

QUESTION 3

Which of the following statements is true? Select the correct answer.

- A. An enterprise service bus commonly provides service broker-related features that allow two services using different data models (that represent the same business document) to communicate with each other.
- B. An enterprise service bus commonly provides service broker-related features that allow two services using different communication protocols to communicate with each other.
- C. An enterprise service bus commonly provides service broker-related features that allow two services to communicate even though they use different communication protocols and different data models (that represent the same business document).
- D. All of these statements are true.

Correct Answer: D

QUESTION 4

Which of the following statements is false? Select the correct answer.

- A. Services built as components can expose a non-industry-standard technical service contract.
- B. Services built as components can be assembled into service compositions.
- C. Services built as components always have a decoupled service contract that exists as a physically separate XML document.
- D. Services cannot be built as components.

Correct Answer: C

QUESTION 5

Identify what is wrong with this statement: "If I have 4 SOAP-based Web services, I must have 4 WSDL definitions and 4 XML schemas." Select the correct answer.

- A. SOAP-based Web services don't use XML schemas for their WSDL definitions.
- B. WSDL definitions can share the same XML schema and can also link to multiple XML schemas, so stating that 4 SOAP-based Web services must have 4 XML schemas is incorrect.
- C. Each WSDL definition must have at least 2 XML schemas, so the correct amount of required XML schemas in this case is 8.
- D. There is nothing wrong with this statement.

Correct Answer: B
