QUESTION 1

WS-BPEL is a technology that can be used to express service composition logic for SOAP-based Web services. Select the correct answer.

A. True

B. False

Correct Answer: A

QUESTION 2

Which of the following technologies can be used to enable the exchange of data between services? Select the correct answer.

A. SOAP

B. HTTP

C. WSDL

D. All of the above.

Correct Answer: D

QUESTION 3

Which of the following statements is true? Select the correct answer.

A. When using WS-AtomicTransaction, services participating in a transaction vote on the outcome so as to communicate whether the transaction should be rolled back or committed.

B. When using WS-AtomicTransaction, services participating in a transaction use RPC protocols to communicate transaction results, so as to communicate whether the transaction should be rolled back

or committed.

C. When using WS-AtomicTransaction, services participating in a transaction rely on the use of WS-Policy definitions to confirm the transaction results.

D. When using WS-AtomicTransaction, services do not actually participate in a transaction. This specification governs intra-service transactions (transactions that occur within a service boundary) only. WS-BusinessActivity provides cross-service transaction protocols.

Correct Answer: A

QUESTION 4

Which of the following statements makes sense? Select the correct answer.

A. I have 3 REST services, 2 of which do not support the PUT method.

B. I have 3 REST services, 2 of which have a PUT operation in the SOAP header schemas of their WSDL definitions.

C. I have 3 REST services, 2 of which do not support HTTP.

D. None of these statements make sense.

Correct Answer: A

QUESTION 5

Identify what is wrong with this statement: "SOAP-based Web services A and B are participating in a runtime transaction that is carried out as per the WS-AtomicTransaction standard. When a message sent by Service A is rejected by Service B due to a violation of a WS-Policy definition expressed as part of the Service B contract, Service A is forced to issue an Abort message, thereby requiring the transaction to be rolled back." Select the correct answer.

A. WS-AtomicTransaction does not support the rollback of changes that occur during runtime transactions.

B. WS-Policy definitions are not expressed as part of the service contract.

C. SOAP-based Web services cannot have policies and cannot participate in runtime transactions because they are limited to the use of a uniform service contract.

D. There is nothing wrong with this statement.

Correct Answer: A
