QUESTION 1

Each time our corporate development team makes a change to the service logic it is required to publish a new version of the service contract. Our customers are complaining because their service consumer programs become incompatible with new service contract versions and therefore no longer work. Which of the following service-orientation principles is most likely to help us solve this on-going problem? Select the correct answer.

A. Service Reusability

B. Service Statelessness

C. Service Loose Coupling

D. Service Autonomy

Correct Answer: C

QUESTION 2

I have a service composition with three services. Service A retrieves a list of country codes from a database and keeps this data in memory while interacting with Service B and Service C. However, because Service A is concurrently invoked many times, and because each instance of Service A loads its own copy of the country code data into memory, the demands on the overall infrastructure become too high and performance and reliability are negatively affected. Which service-orientation principle can be applied to help solve this problem? Select the correct answer.

A. Service Reusability

B. Service Autonomy

C. Service Abstraction

D. Service Statelessness

Correct Answer: D

QUESTION 3

When applying the Service Loose Coupling design principle, we want to _____ the coupling of the service logic to the service contract because that allows the service contract to remain _____ from the service logic. Select the correct answer.

A. increase, decoupled

B. reduce, decoupled

C. increase, coupled

D. reduce, coupled

Correct Answer: A

QUESTION 4

The Service Discoverability principle is supported by the Standardized Service Contract principle in which of the following ways? Select the correct answer.

A. The Standardized Service Contract principle advocates using naming conventions for ensuring that the functionality of services is consistently expressed. By making the service easier to understand, it becomes more discoverable.

B. The Standardized Service Contract principle supports a design process whereby the service contract is customized and created prior to the service logic. This allows service designers to shape the service contract content in such a manner that it can be effectively discovered.

C. The Standardized Service Contract principle requires the use of service contract design standards that can be created to establish conventions that are supportive of the Service Discoverability principle.

D. All of the above.

Correct Answer: D

QUESTION 5

The Service Reusability principle can _____ demands on infrastructure because services that are reused will typically have _____ security, performance, and reliability requirements. Select the correct answer.

A. increase, reduced

B. decease, reduced

C. eliminate, no

D. None of the above.

Correct Answer: D
