## **QUESTION 1**

Ashley\\'s class is doing experiments with probability. They have a box with 3 green balls, 2 blue balls, and 5 red balls.

Ashley picks a red ball from the box and keeps the ball. She passes the box to Larissa.

What is the probability that Larissa picks a blue ball?

A. 0.22

B. 0.18

C. 0.2

D. 0.01

Correct Answer: A

### **QUESTION 2**

FILL BLANK

Write an expression equivalent to  $\frac{b^{11}}{b^4}$  in the form  $b^m$ .

#### A. b7

Correct Answer: A

## **QUESTION 3**

HOTSPOT A student is writing an argumentative report about the causes of sleepwalking. She found possible sources for her report. Read the sources and the directions that follow. Source 1: "What is Sleepwalking?" by Mat Valerio Sleepwalking is a sleep disorder that causes a person to get up and walk while still asleep, usually during the deepest stages of sleep. While sleepwalking, a person does not often respond when someone asks a question or touches him or

her. Though sometimes a sleepwalker will verbally respond, the response will make no sense. A sleepwalking episode can include the person just walking quietly around a room or demonstrating very agitated behavior and trying to "escape" the room.

Source 2: "Is Sleepwalking Genetic?" by Chris Shue Sleepwalking occurs most often during middle childhood through adolescence. Some adults also sleepwalk, but it is much more common among children. Genetics may play a big role in determining who will be a sleepwalker as the tendency runs in families. Environmental and medical conditions also may contribute to sleepwalking episodes. Sleepwalking was described in some of the earliest recorded medical literature, even before Hippocrates, the "father of medicine," lived.

Source 3: "Am I a Sleepwalker?" by Angelique Kandar Research has shown that a variety of factors contribute to sleepwalking episodes. Sleepwalkers are usually operating under a severe lack of sleep or have an irregular or hectic sleep schedule. Often, they are under great amounts of stress or

anxiety. Some medical conditions, such as abnormal heart rhythms, nighttime seizures, and sleep apnea, have been known to cause sleepwalking. Sometimes a person who has taken a certain medication experiences a sleepwalking episode. The student wrote down some claims to use in her report. Look at the claims on the table. Determine if the information in the sources supports each claim. Choose the boxes to show the claims that each source supports. A source may have

more than one box chosen.

Hot Area:

	Source	Source 2	Source 3
Claim 1: Some outside influences make a person more likely to sleepwalk.			
Claim 2: If your mother was a sleepwalker, it is more likely that you will be, too.			
Claim 3: When people are sleepwalking they are not aware of their surroundings.			
Claim 4: Going to bed at the same time every night can help some children not to sleepwalk.			

Correct Answer:

	Source	Source 2	Source 3
Claim 1: Some outside influences make a person more likely to sleepwalk.			
Claim 2: If your mother was a sleepwalker, it is more likely that you will be, too.			
Claim 3: When people are sleepwalking they are not aware of their surroundings.			
Claim 4: Going to bed at the same time every night can help some children not to sleepwalk.			

#### **QUESTION 4**

Which of these expressions is equivalent to  $3x^2 - 4xy + y^2$ ?

A. (3x - y) (x - y)

B. (3x + y) (x - y)

C. (3x + y) (x + y)

D. (3x -y) (x + y)

Correct Answer: A

# **QUESTION 5**

Which of these sentences uses incorrect parallel structure?

- A. Every night, Markie brushes her teeth, puts on her pajamas, and kisses her parents good-night.
- B. Sandra likes to hike in the woods, ride her mountain bike, and go swimming with her friends.
- C. Michael not only hosted the graduation party for his nephew, but also bought him a vacation package.
- D. When he goes to the beach, Ian builds sandcastles, swims in the ocean, and enjoys the warm sunshine.

Correct Answer: B
