QUESTION 1

Your company recently implemented Azure Active Directory (Azure AD) Privileged Identity Management (PIM).

While you review the roles in PIM, you discover that all 15 users in the IT department at the company have permanent security administrator rights.

You need to ensure that the IT department users only have access to the Security administrator role when required.

What should you configure for the Security administrator role assignment?

A. Expire eligible assignments after from the Role settings details

B. Expire active assignments after from the Role settings details

C. Assignment type to Active

D. Assignment type to Eligible

Correct Answer: D

Reference: https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure

QUESTION 2

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains an Azure AD enterprise application named App1.

A contractor uses the credentials of user1@outlook.com.

You need to ensure that you can provide the contractor with access to App1. The contractor must be able to authenticate as user1@outlook.com.

What should you do?

A. Run the New-AzureADMSInvitation cmdlet.

B. Configure the External collaboration settings.

C. Add a WS-Fed identity provider.

D. Implement Azure AD Connect.

Correct Answer: A
