Correct Answer: A

https://en.wikipedia.org/wiki/Virtual_Network_Computing#:~:text=VNC%20by%20default%2 0uses% 20TCP,Java%2Denabled%20web%2Dbrowser. VNC by default uses TCP port 5900+N,[6][7] where N is the display number (usually :0 for a physical display). Several implementations also start a basic HTTP server on port 5800+ N to provide a VNC viewer as a Java applet, allowing easy connection through any Java- enabled web-browser. Different port assignments can be used as long as both client and server are configured accordingly. A HTML5 VNC client implementation for modern browsers (no plugins required) exists too.[8]
