- A. procupdate
- B. pstree
- C. ls-la
- D. ps -x
- E. top
- F. showproc

Correct Answer: E

QUESTION 5

What is the default port a VNC Client uses to connect?

- A. TCP 5901
- B. DP 5901
- C. TCP 5801
- D. DP 5801

Correct Answer: A

https://en.wikipedia.org/wiki/Virtual_Network_Computing#:~:text=VNC%20by%20default%20uses%20TCP,Java%2Denabled%20web%2Dbrowser. VNC by default uses TCP port 5900+N,[6][7] where N is the display number (usually :0 for a physical display). Several implementations also start a basic HTTP server on port 5800+ N to provide a VNC viewer as a Java applet, allowing easy connection through any Java-enabled web-browser. Different port assignments can be used as long as both client and server are configured accordingly. A HTML5 VNC client implementation for modern browsers (no plugins required) exists too.[8]
