- D. SugarApplication

Correct Answer: C

---

### QUESTION 4

You are attempting to fetch a list of leads using the REST v10API, but after several successful requests, you are

receiving the error code, "not\_authorized".

Which two actions would you perform to correct this problem? (Choose two.)

- A. Call the POST /oauth2/token endpoint using a grant\_type of access\_token.
- B. Call the POST /oauth2/token endpoint using a grant\_type of password.
- C. Call the POST /oauth2/token endpoint using a grant\_type of refresh\_token.
- D. Call the POST /oauth2/token endpoint using a grant\_type of download\_token.

Correct Answer: AC

---

#### QUESTION 5

You created a new endpoint for the REST v10API.

Which two statements describe the class you created? (Choose two.)

- A. The class uses the DBManager class to define attributes of your endpoint within the database.
- B. The class contains a Sidecar controller that is executed when your endpoint is called.
- C. The class uses the registerRestApi() method to define attributes of your endpoint.
- D. The class contains a custom PHP method that is executed when your endpoint is called.

Correct Answer: BC
