to Job. Both objects are set to Private in sharing settings. The HR team will own all Job and Job Interview records. They have asked their Salesforce Architect to automatically share the Job Interview when the Interviewer (lookup to user record) has been populated. The interviewer can be from any department. What method should the Architect use to achieve this requirement?

A. Build apex Managed Sharing code to share Job Interview with the Interviewer user

B. Build a criteria-based sharing rule between the Job Interview and the Interviewer

C. Build a standard sharing rule between Job Interview and the Interviewer

D. Build a workflow email notification to notify the interviewer of the record assignment

Correct Answer: A

QUESTION 5

Universal Containers (UC) stores basic employee information in a custom Employee object (OWD - Public Read Only). There are a few sensitive fields that need restricted access (salary, grade level, last performance rating).

Other than field level security, what other options are available to make these fields accessible to the Human Resource team?

A. Create a new custom object controlled by parent and a Master-Detail relationship to Employee to store new restricted information.

B. Change OWD of Employee custom object to private and a Lookup self-relationship to store only new restricted information.

C. Create a new custom object with private OWD and Lookup relationship to Employee to store new restricted information.

D. There are no other options besides using field level security.

Correct Answer: C
