QUESTION 1

A technician is tasked with providing network-based high availability to a pair of identical web servers. Which of the following minimum server NIC configurations fulfills these requirements?

- A. Two physical NICs per server: one NIC configured for multicast and one for broadcast.
- B. One physical NIC per server: each individual NIC configured for network load balancing.
- C. Two physical NICs per server: one NIC for network traffic, and one for web traffic.
- D. One physical NIC per server: each NIC configured with the same MAC and IP address.

Correct Answer: B

QUESTION 2

A hardware failure affects a server in a datacenter. The server is critical to company operation, and the hardware vendor is out of stock on the parts needed to repair the server. A network technician suggests replacing it with a server from the warm site. Which of the following should the technician do FIRST?

- A. Outsource a hardware-certified courier to move the server to the datacenter.
- B. Check the DRP and BCP and talk to the company stakeholders before making the decision.
- C. Unrack the server from the warm site and move it to the datacenter.
- D. Order the parts from the hardware vendor and notify affected users that the server will be down.

Correct Answer: B

QUESTION 3

A system administrator is asked to set up several physical file servers that have recently crashed due to a power failure. Which of the following documents should the administrator refer to in order to complete this task?

- A. Server configuration documentation
- B. Network diagram
- C. Asset management documentation
- D. Dataflow diagram

Correct Answer: A

QUESTION 4

A server prompts Ann, a user, to reset her logon password. The next time Ann tries to log onto the server, she cannot

remember her new password. After several failed attempts, Ann receives a message that she cannot attempt to log on again without the help of an administrator. Which of the following should an administrator do to remedy this issue? (Choose two.)

- A. Reset Ann\\'s password
- B. Unlock Ann\\'s account
- C. Reboot the server
- D. Recreate Ann\\'s profile
- E. Check Ann\\'s profile
- F. Verify Ann\\'s ACL

Correct Answer: AB

QUESTION 5

A remote datacenter that runs in parallel with a main datacenter, with devices powered on and communication taking place between the two datacenters, is known as which of the following?

- A. Hot site
- B. Warm site
- C. Cold site
- D. DR site

Correct Answer: A
