QUESTION 1

A Symantec Messaging Gateway 10.5 administrator is creating a new spam policy and needs to choose a message condition. Which two are valid message conditions? (Select two.)

- A. a message that contains a header from DLP
- B. a message that is spam or suspected spam
- C. a message that contains prepended notation
- D. a message that is unscannable
- E. a message that fails bounce attack validation

Correct Answer: BE

QUESTION 2

What must be done before using Spam Quarantine?

- A. Configure address resolution
- B. Configure groups to have a policy to quarantine messages
- C. Configure a partition for use by Spam Quarantine
- D. Configure Spam Scan settings to identify suspected spam

Correct Answer: B

QUESTION 3

What is an advantage of Symantec Content Encryption over TLS encryption?

- A. Ensures compliance with government-mandated regulations
- B. TLS encryption provides better security than content encryption.
- C. May be implemented without requiring SSL certificates for each scanner
- D. Ensures secure end-to-end delivery of sensitive messages

Correct Answer: D

QUESTION 4

Bounce attack prevention is enabled. An incoming non-delivery report (NDR) is received and its signature fails to be verified. What does Symantec Messaging Gateway 10.5 do with the message by default?

- A. forwards it to the administrator
- B. rejects the message
- C. forwards it to suspect spam
- D. sends it to Symantec Security Response

Correct Answer: B

QUESTION 5

Symantec Messaging Gateway 10.5 is running out of disk space due to storing extended logs. The administrator is required to store extended log data for more than a year. Which action should the administrator take?

- A. lower the maximum log storage limit
- B. deploy Control Center on virtual appliance and add more disk space
- C. configure remote logging
- D. add higher capacity disks to appliance RAID array

Correct Answer: C
