QUESTION 1

You have the following chart that shows profits and discounts over time.

You need to combine the lines to appear as shown in the following chart.

What should you do?

A. Drag Discount to Color on the Marks card

B. Convert Discount to Discrete C. Set Discount to Dual Axis
D. Drag Discount to the Columns shelf

Correct Answer: A

QUESTION 2

You have a line chart on a worksheet.

You want to add a comment to March 2020 as shown in the following visualization.
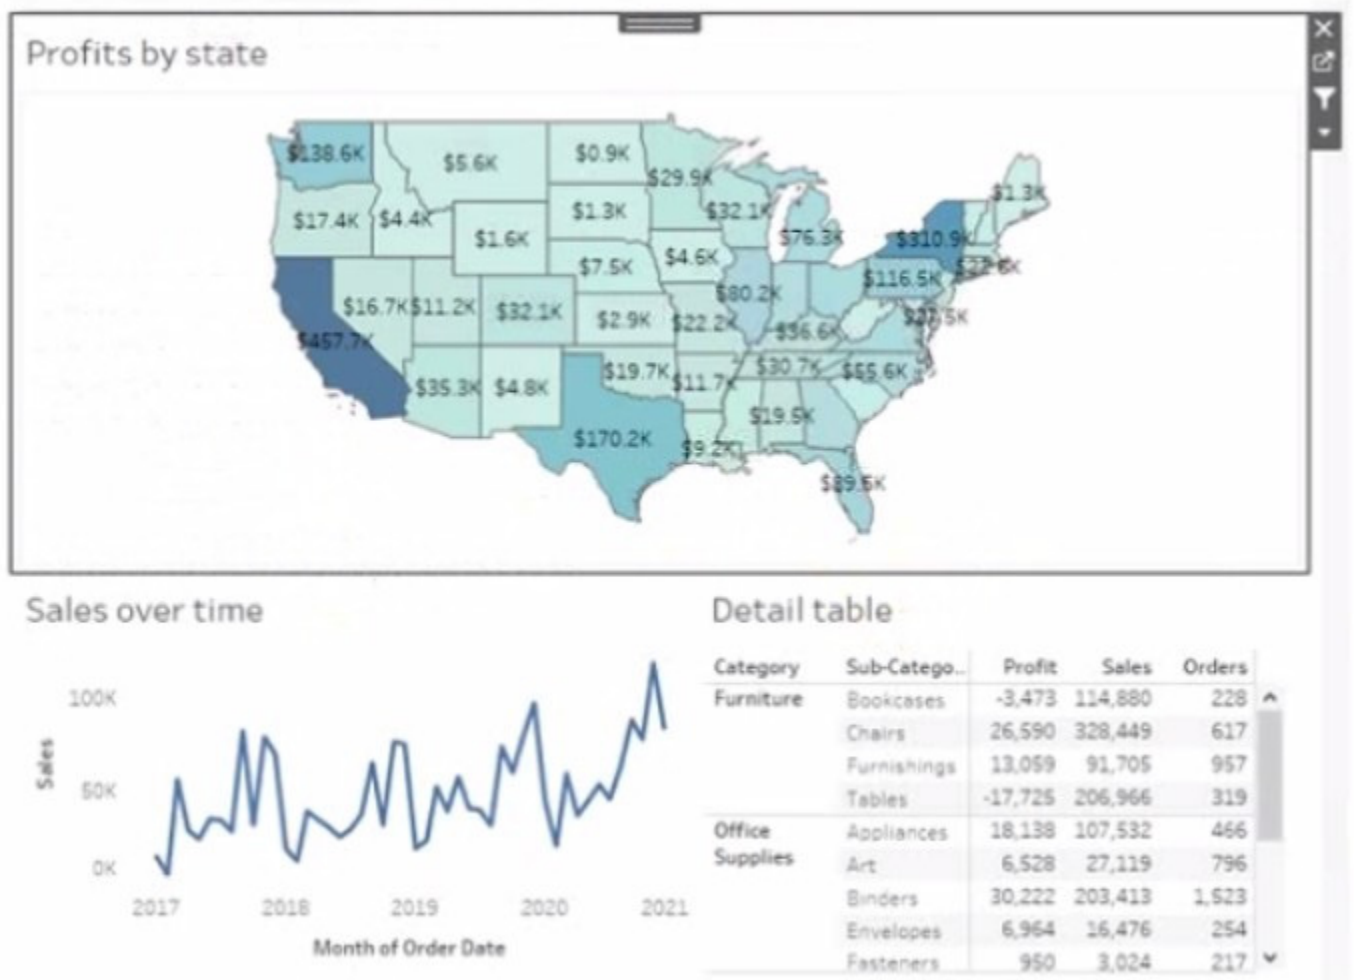

What should you do?

March 2020 grew
190.0% from the
previous month.

January February March April May June July August September October November December

A. Drag the growth rate to Text on the Marks card

B. Enable captions

C. Annotate March 2020

D. Add a tooltip

Correct Answer: D

QUESTION 3

You have the following dashboard.

Currently the map is used as a filter that affects the data on the otter sheets of the dashboard

You need to configure the dashboard to ensure that selecting a data point on the map only tillers the Detail table

What should you do?

A. From the context menu of Sales over time select Ignore Actions

B. From the context menu of Sales over lime select Remove Dashboard Item

C. From the context menu of Profits by Stale deselect Use as Filter

D. From the context menu of Sales over time select Deselect

Correct Answer: B

QUESTION 4

You have a workbook that connects to a database. The database requires authentication.

You plan to publish the workbook and schedule a daily refresh of the data.

Which two conditions must be met to schedule the refresh? Choose two.

A. The credentials must be embedded.

B. The data source must be stored as a hyper file.

C. The data source must use a live connection.

D. The data must be extracted.
Correct Answer: AD

To schedule a refresh of the data, you need to ensure that Tableau Server or Tableau Online can access the database without prompting for credentials. This can be done by embedding the credentials in the workbook or the published data source. You also need to extract the data from the database and publish it as a separate data source or as part of the workbook. A live connection would not allow you to refresh the data on a schedule, as it would always query the database directly. A hyper file is a format for storing extracted data, but it is not a requirement for scheduling a refresh. QUESTION 5

You have the following dataset

Date	Category	Sales
5/4/21	Office Supplies	3612
5/5/21	Office Supplies	7453

You need to create the following visualization.

Which quick table calculation should you drag to Text on the Marks card?

A. Percent of Total

B. Percent Difference

C. Compound Growth Rate

D. Percentile

Correct Answer: A

Explanation: we need to create a quick table calculation that shows the percent of total sales for each category and sub-category. To do this, we can follow these steps:

Drag Category to Columns and Sub-Category to Rows.

Drag Sales to Text on the Marks card.

Right-click Sales on the Marks card and select Quick Table Calculation > Percent of Total.

Right-click Sales on the Marks card again and select Compute Using > Category. This will create a quick table calculation that shows the percent of total sales for each sub- category within each category. The visualization will look like this:
