QUESTION 1

You create a parameter named Choose Region that contains values from a field named Region.

You want users to be able to use the Choose Region parameter to interact with a chart by logging between different regions

What should you do next?

- A. Add Region to the Filters card
- B. Add the [Region] = [Choose Region] formula to the Filters card
- C. Add the Choose Region parameter to the Pages card
- D. Set the Choose Region parameter to Single Value (list)

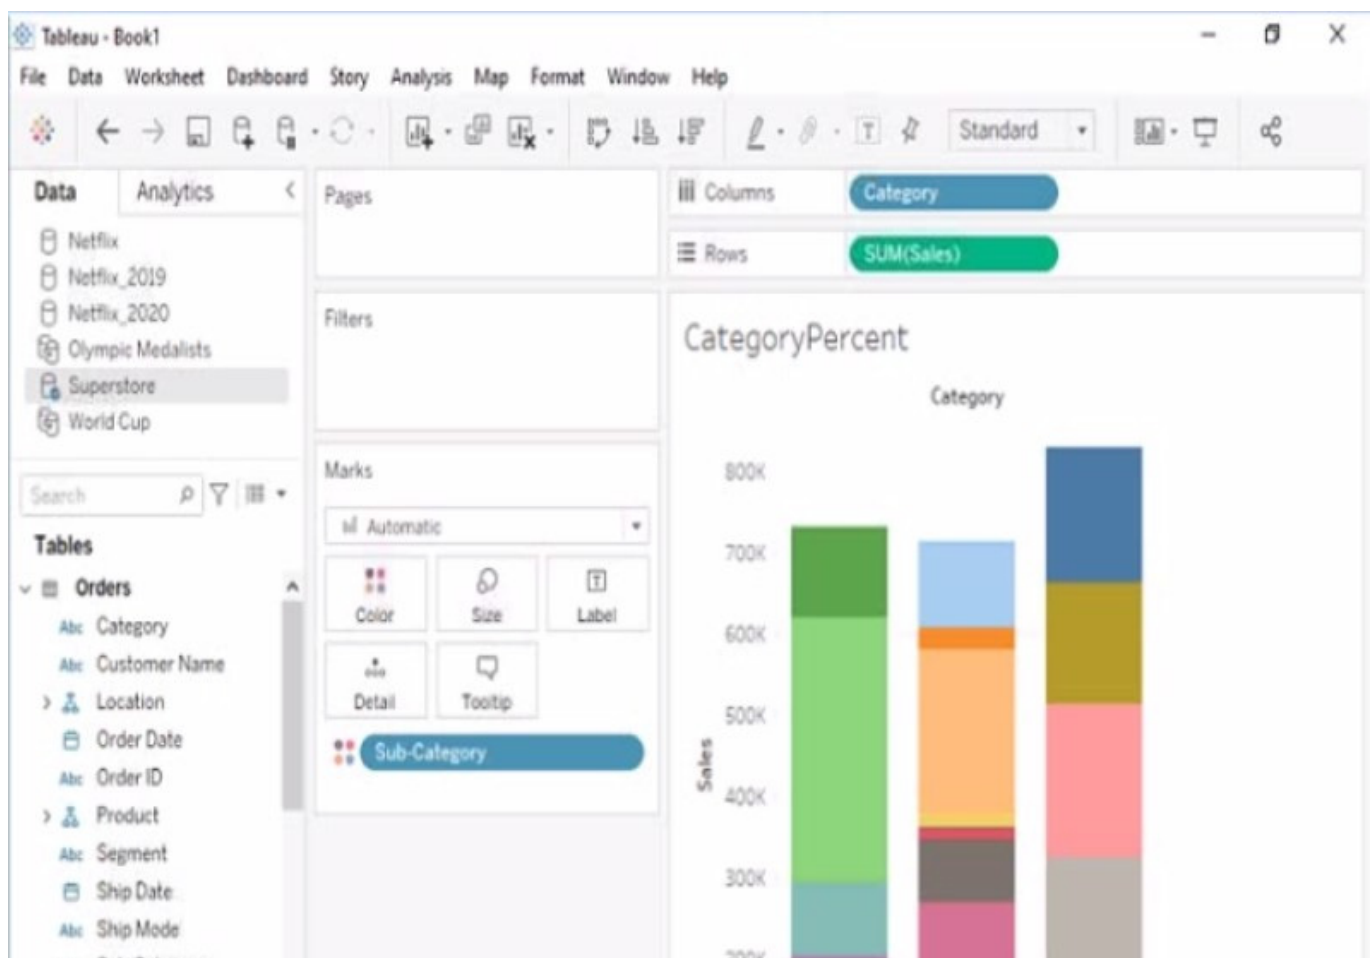

Correct Answer: A

QUESTION 2

CORRECT TEXT

Open the link to Book1 found on the desktop. Open the CategoryPercentage worksheet.

Modify the bar chart to show the percentage of sales for each Subcategory within every Category. The total percentage for every Category must be 100%.

A. Check the steps below in explanation.

Correct Answer: A

To modify the bar chart to show the percentage of sales for each Subcategory within every Category, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the CategoryPercentage worksheet.

Click on the CategoryPercentage tab at the bottom of the workbook to open the worksheet. You will see a bar chart that shows the total sales for each Subcategory across all Categories.

Right-click on Sales on the Columns shelf and select Add Table Calculation from the menu. This will open a dialog box that allows you to apply a calculation to your measure.

Select Percent of Total from the Calculation Type drop-down list. This will calculate the percentage of sales for each Subcategory out of the total sales for all Subcategories.

Select Category from the Compute Using drop-down list. This will calculate the percentage of sales for each Subcategory within every Category, instead of across all Categories. The total percentage for every Category will be 100%.

Click OK to apply the table calculation. You will see that the bar chart now shows the percentage of sales for each Subcategory within every Category.

Create a histogram on the Quantity field by using bin size of 3.

worksheet with no marks.

Right-click on Quantity in the Measures pane and select Create Bins from the menu. This will open a dialog box that allows you to create bins for the Quantity field. Bins are groups of values that are treated as one unit in a histogram.

Enter 3 in the Size of bins text box. This will set the bin size to 3, which means that each bin will contain values that are 3 units apart. For example, one bin will contain values from 0 to 2, another bin will contain values from 3 to 5, and so on.

Click OK to create the bins. You will see a new field named Quantity (bin) in the Measures pane with a # sign next to it.

Drag Quantity (bin) from the Measures pane to Columns on the worksheet. This will create a histogram that shows the distribution of Quantity by bins. You will see bars that represent the frequency or count of values in each bin.

Optionally, you can adjust the width, color, and labels of the bars by using the options on the Marks card. You can also add filters, tooltips, or annotations to enhance your histogram.

QUESTION 4

You are creating an annual report in Microsoft Word. In Tableau Desktop, you build a chart in a worksheet.

You want to create an image of the chart that you can add to the annual report.

What are two ways to create the image? Choose two.

- A. From the Worksheet menu, use the Export option.
- B. From the Worksheet menu, use the Copy option.
- C. From the File menu, use the Export As Version option.
- D. From the Dashboard menu, use the Export Image option.
- E. From the Dashboard menu, use the Copy Image option.

Correct Answer: AB

Explanation: To create an image of the chart that you can add to the annual report, you can use either the Export option or the Copy option from the Worksheet menu. The Export option will allow you to save the image as a file in a specified

location, name, and format. The Copy option will allow you to copy the image to the clipboard and paste it into another application, such as Microsoft Word. Both options will let you choose which elements to include in the image, such as title,

caption, legend, etc. References:
