QUESTION 1

You connect to a database server by using Tableau Prep. The database server has a data role named Role1.

You have the following field in the data.

Material
Concrete
Concret
Brick
Brik
steel
Stel
Drywall

You need to apply the Role1 data role to the Material field.

Which two actions should you perform? Choose two.

- A. From the More actions menu of Materials, select Valid in the Show values section.
- B. For the data type of the Material field, select Custom, and then select Role1.
- C. From the More actions menu of Materials, select Group Values, and then select Spelling.
- D. From the More actions menu of Materials, filter the selected values.

Correct Answer: BC

To apply a custom data role to a field, you need to select the data type of the field and then choose the data role from the list of available roles. This will validate the values in the field against the data role and mark any invalid values with a red exclamation mark. To fix the invalid values, you can use the Group Values option and select the Spelling algorithm, which will group values that are close in spelling and replace them with the most frequent value in the group. This will help you standardize the values in the Material field and match them with the Role1 data role. QUESTION 2

You have the following line chart that shows the average sales by month.

Which month had the biggest increase in swage sales compared to the previous month in 2019?

- A. August
- B. October
- C. December
- D. November

Correct Answer: B

QUESTION 3

HOTSPOT

You have a data source that contains the following columns.

Name	Data type
Order Date	Date
Order Number	String
Customer Name	String
Sales	Number (decimal)
Profit	Number (decimal)

You want to sort customers based on the most expensive orders.

How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

Hot Area:

FIRST (AVG ([Sales]), ASC)
FIRST
RANK
WINDOW_MAX
AVG
MAX
SUM
ASC
DESC
LAST

Correct Answer:

FIRST (AVG ([Sales]), ASC)
FIRST
RANK
WINDOW_MAX
AVG
MAX
SUM
ASC
DESC
LAST

QUESTION 4

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points.

Which Layout option should you use?

- A. Dots
- B. Arrows only
- C. Caption boxes
- D. Numbers

Correct Answer: D

Explanation: To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you indicate the progress and order of your story points more clearly than the other options. QUESTION 5

You have a line chart on a worksheet.

You want to add a comment to March 2020 as shown in the following visualization.

What should you do?

- A. Drag the growth rate to Text on the Marks card
- B. Enable captions
- C. Annotate March 2020
- D. Add a tooltip

Correct Answer: D
