QUESTION 1

By which gland in the body is produced follicle-stimulating hormone (FSH), which is responsible for maturation of follicles in the ovary?

- A. corpus luteum
- B. ovary
- C. anterior lobe of pituitary gland
- D. posterior lobe of pituitary gland

Correct Answer: C

QUESTION 2

Which of the following is exchanged between two or more atoms that undergo ionic bonding?

- A. electrical charges
- B. valence electrons
- C. transitory electrons
- D. neutrons

Correct Answer: B

An ionic bond forms when one atom donates an electron from its outer shell, called a valence electron, to another atom to form two oppositely charged atoms.

QUESTION 3

The law of conservation of mass states that _____.

- A. The total mass of all products of a chemical reaction is independent of the total mass of all the reactants. They are not related.
- B. The total mass of all products of a chemical reaction is equal to the total mass of all the reactants.
- C. The total mass of all products of a chemical reaction is more than the total mass of all the reactants.
- D. The total mass of all products of a chemical reaction is less than the total mass of all the reactants, because some mass converts to energy during reaction.

Correct Answer: B

QUESTION 4

Which of these statements regarding the gastrointestinal tract is false?

- A. Villi present in the large intestine absorb water and mineral salts.
- B. The ileum absorbs B12 and bile salts.
- C. The large intestine secretes no enzymes.
- D. Villi contain lacteals for the absorption of fats.

Correct Answer: A

QUESTION 5

Which group of major parts and organs make up the immune system?

- A. nose, trachea, bronchial tubes, lungs, alveolus, and diaphragm
- B. heart, veins, arteries, and capillaries
- C. brain, spinal cord, and nerve cells
- D. lymphatic system, spleen, tonsils, thymus, and bone marrow

Correct Answer: D

The immune system consists of the lymphatic system, spleen, tonsils, thymus and bone marrow.
