QUESTION 1

While troubleshooting a crash event on an ESXi 5.x host, an administrator determines the log files related

to the event are NOT present.

Which action should the administrator take to resolve the logging issue?

A. Increase the amount of memory committed to log storage.

B. Increase the statistic data collection level to 4.

C. Change the roll-up type to maximum.

D. Create a persistent scratch location.

Correct Answer: D

QUESTION 2

When vCloud Automation Center provisions a vSphere virtual machine from a Blueprint, how is the selection of storage
paths prioritized?

A. The storage path with the highest priority number is selected for provisioning.

B. Storage paths are ordered by priority number (lowest to highest) before considering the space available.

C. Storage paths with sufficient space available are considered; then the highest priority number is selected.

D. Storage paths with sufficient space available are considered; then the lowest priority number is selected.

Correct Answer: B

QUESTION 3

A vCloud Automation Center administrator needs to maximize the re-use of blueprints across the

enterprise while providing a department the ability to make their own changes.

What should the administrator do?

A. Create Global Blueprints and enable the copyable option.

B. Create Global Build Profiles and enable the copyable option.

C. Create Local Blueprints and enable the copyable option.

D. Create Local Build Profiles and enable the copyable option.

Correct Answer: A

QUESTION 4

An administrator adds a newly installed host running the most current version of ESXi to an existing

resource cluster. Virtual machines do not deploy to the newly added host.

What is a probable cause of this issue?

A. The host was not prepared for vCloud integration.

B. The host does not support the virtual machine hardware version.

C. The cluster containing the host is disabled.

D. The host has insufficient resources.

Correct Answer: A

QUESTION 5

Which statement is true regarding the licensing of vCenter Server?

A. The license for vCenter Server must be provided at the time of installation.

B. Changing the license assigned to vCenter Server requires a restart of the vCenter Server service.

C. Virtual machines can still be powered on if the vCenter Server license expires.

D. Licensing for a single vCenter Server installation is determined by the number of managed virtual machines.

Correct Answer: C
