QUESTION 1

While troubleshooting a crash event on an ESXi 5.x host, an administrator determines the log files related to the event are not present.

Which action should the administrator take to resolve the logging issue?

- A. Increase the amount of memory committed to log storage.
- B. Increase the statistic data collection level to 4.
- C. Change the roll-up type to maximum.
- D. Create a persistent scratch location.

Correct Answer: D

QUESTION 2

An administrator is performing the post-installation configuration of Workspace Portal. While running the setup wizard, the administrator receives an error message. The error message appears during configuration of the Directory settings and indicates that the user account cannot be found.

The administrator has confirmed the following:

What is causing the error?

- A. The user account is located below the Base DN.
- B. The user account has not been entered into the Global Catalog.
- C. The user account is located above the Base DN.
- D. The user account name is too long.

Correct Answer: C

QUESTION 3

From which two sources can an OVF template be deployed using the vSphere Client? (Choose two.)

- A. a local file
- B. a local file on a VMFS datastore
- C. an HTTP URL
- D. an FTP URL

Correct Answer: AC

QUESTION 4

An administrator experiences a system failure on the vCenter Server during a Linked-Clone recompose operation.

Which two methods should the administrator use to resolve the unsuccessful recompose operation? (Choose two.)

- A. Select a new snapshot and then recompose once more.
- B. Delete the failed snapshot and then recompose once more.
- C. Delete the failed snapshot, create a new snapshot, and then recompose once more.
- D. Select the snapshot that was used in the last successful recomposition and then recompose once more.

Correct Answer: AD

QUESTION 5

An administrator is creating a shared folder to use as the Profile Repository for Persona Management. Which requirement must be met?

- A. The shared folder must be in the same Active Directory forest as the users who use the shared folder.
- B. The shared folder must be on an FTP server.
- C. The shared folder cannot be shared across View Pools.
- D. The shared folder must be on a Network Files System (NFS) share.

Correct Answer: A
