Following Questions and Answers are all new published by Veritas Official Exam Center

QUESTION 1

An administrator has replaced a network interface card (NIC) in one of the cluster nodes which is configured to LLT heartbeat. Upon the node restart, the LLT links are disconnected.

Which file should the administrator edit to allow LLT to utilize the replaced NIC?

A. /etc/gabtab

B. /etc/llthosts

C. /etc/networks

D. /etc/llttab

Correct Answer: D

QUESTION 2

A multi-tier application has Oracle at the first level and WebSphere at the second level, which depends on the Oracle application. The Oracle and WebSphere service groups are configured in two separate cluster. The administrator wants the following fault behavior:

1.

when the Oracle service group faults, the WebSphere service group should stay online

2.

when the Oracle service group comes back online, the WebSphere service group should be taken offline and brought back online

Which type of dependency must the administrator configure to acquire the desired behavior?

A. virtual business services with soft type of fault dependency

B. virtual business services with an online global firm dependency

C. virtual business services with firm type of fault dependency

D. virtual business services with restart type of fault dependency

Correct Answer: D

QUESTION 3

Which type of VMware disks are supported for SCSI-3 disk-based I/O fencing in a VMware in-guest cluster?

A. raw device mapping with virtual compatibility mode

B. raw device mapping with physical compatibility mode

C. virtual machine disks (vmdk) with physical compatibility mode

D. virtual machine disks (vmdk) from a VMFS datastore

Correct Answer: D

QUESTION 4

An administrator wants to deploy a complex cluster configuration that will include over six nodes, I/O fencing, and multiple private cluster interconnections.

Which method will help the administrator to implement rapid cluster deployment?

A. prepare a custom main.cf file using the sample template files and copy the file to all cluster nodes

B. generate a custom installation script using the Veritas Services and Operations Readiness Tools (SORT) website

C. prepare a custom response file in Veritas InfoScale Operations Manager (VIOM) and push it out to the new cluster

D. prepare a custom response file to build the new cluster configuration using /opt/VRTS/install/installer

Correct Answer: D

QUESTION 5

Which requirements must an administrator meet prior to implementing an InfoScale Availability cluster that includes both physical and virtual machines?

A. ensure all systems in the cluster have access to virtualized storage devices

B. ensure shared storage supports SCSI-3 persistent reservations

C. ensure VMware HA VM monitoring is enabled

D. ensure the systems have access to the same shared storage devices

Correct Answer: B
