QUESTION 1

To reduce network use by limiting the number of parallel backup streams, which cloud setting should be modified under the Scalable Storage host property?

A. Metering > Metering interval

B. Network Connections > Maximum concurrent jobs

C. Throttling > Total available bandwidth

D. Throttling > Sampling interval

Correct Answer: B

QUESTION 2

Which two restore types must be initiated from a client system rather than the NetBackup Administration Console on the master server? (Select two.)

A. Oracle

B. MS-SharePoint

C. MS-Exchange

D. MS-SQL-Server

E. VMware

Correct Answer: AE

QUESTION 3

A NetBackup policy is configured to back up the following paths for a client:

D:\stage E:\data E:\home F:\production

Multi-streaming is enabled for the backups, and multiplexing is set to 4. Backup streams are running slowly.

Which step should the administrator consider to improve backup performance?

A. increase the multiplexing level

B. back up only one stream from each physical device on the client

C. disable multistreaming

D. increase the number of data buffers

Correct Answer: B

QUESTION 4

Refer to the exhibit.

Two media servers, sharing a library with 6 tape drives, exist in the NetBackup environment displayed in the exhibit. Both weekly full and daily differential incremental backups need to run for the clients and each schedule has a different retention period. Because of network topology, some clients back up to Media server 1 and some back up to Media server 2. The environment suffers from multiple status 96 failures during the backup window.

How can the administrator minimize the number of failures?

A. increase the Media unmount delay

B. configure media multiplexing

C. enable backups to span tape media

D. enable media sharing

Correct Answer: D

QUESTION 5

A NetBackup environment with a single tape storage unit is experiencing performance issues when running full backups of a Windows file server with over a million small files. Backups for all other clients on the same network are performing adequately.

What should the administrator modify to improve performance for the client?

A. enable Windows Change Journal

B. modify data buffer settings for the data path

C. enable the Use Accelerator policy attribute

D. use Flashbackup-Windows policy type

Correct Answer: D
