### QUESTION 1

Weekly full backups run for clientA on master1 using a storage unit that belongs to media1. The administrator is required to retain clientA\\S full backups for a period of four months. When the administrator modifies the full schedule, an option for 4 months is missing from the Retention drop-down list.

How can the administrator add a four-month retention?

- A. modify an existing retention level in the mater server host properties, under Retention Periods
- B. ignore the selection list and type in the desired retention period directly
- C. add a new retention period in the media server host properties, under Retention Periods
- D. increase the Image cleanup interval in the master server host properties, under Clean-up

Correct Answer: C

---

### QUESTION 2

Which feature is enabled after adding a master server to the Trusted Master Servers tab?

- A. backup of clients in other master server domains
- B. remote console to another master server
- C. targeted Auto Image Replication
- D. remote catalog backups

Correct Answer: C

---

### QUESTION 3

Backup images that reside in an MSDP storage pool have been manually expired using bpexpdate. Which step must an administrator perform to manually free the associated space in the storage pool?

- A. run image cleanup on the medial server that hosts the MSDP storage server
- B. run an inventory on the MSDP storage pool
- C. run content router queue processing on media server that hosts the MSDP storage server
- D. run content router queue processing on the master server

Correct Answer: C

---

### QUESTION 4

An administrator has a backup for client Linux1 using the LinuxClients policy complete successfully. Even though the policy Backup Selections are NOT modified, the backup job fails the next day with the following status code:

Error 71: none of the files in the file list exist.

What is a possible reason the job failed?

- A. The Enable granular recovery option was unset.
- B. The client was added to another backup policy.
- C. The file systems have been unmounted on the client.
- D. The client was temporarily shut down.

Correct Answer: C

---

#### QUESTION 5

In which scenario is Use Accelerator unavailable in a backup policy?

- A. for VMware virtual machines with a Linux guest OS
- B. for virtual machines hosted on a Hyper-V Host using WMI
- C. for a NetApp NDMP filer
- D. for an Exchange database availability group (DAG)

Correct Answer: C
