QUESTION 1

An administrator has downloaded a patch from the NetBackup appliance support website to a Windows client. The administrator plans to move the patch to the appliance through a file share.

Accessing the \\incoming patches folder from the Windows client fails.

What does the administrator need to perform?

- A. login to Windows as a NetBackupCLI user
- B. install the Microsoft NFS Client package on the Windows client
- C. use the share Open command in the CLISH
- D. use the copy /k> command to join the split tar files

Correct Answer: A

QUESTION 2

An administrator has a backup for client Linux1 using the LinuxClients policy complete successfully, even though the policy Backup Selections are NOT modified, the backup job fails the next day with the following status code:

```
Error 71: none of the files in the file list exist.
```

What is a possible reason the job failed?

- A. The Enable granular recovery option was unset.
- B. The client was added to another backup policy.
- C. The file systems have been unmounted on the client.
- D. The client was temporarily shut down.

Correct Answer: C

QUESTION 3

Which disk type is unsupported in a Media Server Load Balancing storage unit group?

- A. Pure Disk
- B. BasicDisk
- C. AdvancedDisk
- D. Cloud Storage

Correct Answer: B

QUESTION 4

What should an administrator do to enable backups to span multiple BasicDisk storage units?

- A. configure a storage unit group and add BasicDisk storage units from multiple Media Servers
- B. configure a storage unit group that consists only of disk storage units defined on a single Media Server
- C. confirm that a load balancing storage unit is selected at the group level
- D. select Storage Units > Storage Unit > Allow backup to span disks

Correct Answer: B

QUESTION 5

An administrator needs to store secure tape copies of protected data to an offsite location. How can the administrator automatically eject tape media daily and create detailed reports?

- A. encrypt the tapes using software encryption and use a storage lifecycle policy to perform automatic ejects and create reports
- B. enable the encryption attribute on the vault policy to perform automated ejects and create reports
- C. use tape drives that support hardware encryption and use a vault policy to perform automated ejects and create reports
- D. use tape drives that support hardware encryption and use a storage lifecycle policy to perform automated ejects and create reports

Correct Answer: A
