QUESTION 1

An administrator has Backup Exec 16 with the Capacity Edition Lite. The administrator purchases a new, addition tape library with three tape drives.

How can the administrator use the tape library with three tape drives?

- A. purchase the Enterprise Server Option (ESO)
- B. upgrade to the Capacity Edition
- C. purchase two licenses for Library Expansion Option (LEO)
- D. add a VTL Unlimited Drive Option (VUDO)

Correct Answer: C

QUESTION 2

The security team that monitors and audits a network has captured unexpected but regular network traffic being sent from the Backup Exec server to systems that are deliberately restricted from being involved with Backup Exec. The team has notified the backup administrator of the findings.

Which Backup Exec setting should the administrator change to stop the unexpected network traffic?

- A. Allow Backup Exec to report anonymous usage information
- B. Discover servers that have data that has not been backed up
- C. Enable TCP dynamic port range
- D. Check for updates automatically according to a schedule

Correct Answer: C

QUESTION 3

An administrator runs a Back up to Disk and Simultaneously Convert to Virtual Machine job. Which two actions occur if the backup job fails? (Select two.)

- A. the conversion job fails
- B. the conversion job succeeds
- C. the conversion job succeeds with exceptions
- D. the conversion job runs again during the next full backup
- E. the conversion job runs again independently

Correct Answer: AD

QUESTION 4

An administrator is attempting to browse file and directory details, but only backup set header information is available.

What may be the cause for the lack of detailed information; and how should the administrator enable the selection of individual items for restore?

- A. The backup sets have expired, and the media must be re-cataloged.
- B. The backup sets have expired, and the media must be re-inventoried.
- C. The Backup Exec server catalog settings have been set to truncate automatically, and the media must be re-cataloged
- D. The Backup Exec server catalog settings have been set to truncate automatically, and the media must be re-inventoried.

Correct Answer: D

QUESTION 5

Which two options can an administrator use to prevent data on disk that is from a previously run backup job from being deleted? (Select two.)

- A. the backup set Expiration option
- B. the backup set Details option
- C. the backup media Expiration option
- D. the backup set Retain option
- E. the backup media Retain option

Correct Answer: AD
