QUESTION 1

Which statement accurately describes derived emails that can be found in a discussion chain?

- A. they can be reviewed and tagged
- B. they can be found using '\\find similar\\'
- C. they are shown for thread clarity
- D. they are shown as an item in the filter

Correct Answer: C

QUESTION 2

What is the minimum Enterprise Vault archive account permission(s) required to successfully run the Enterprise Vault Collection Task?

- A. Read
- B. Read and Write
- C. Read and Modify
- D. Full Control

Correct Answer: A

QUESTION 3

What are two advantages to using the Native/Image view instead of the Text view when reviewing documents? (Select two.)

- A. If there are images present in the original documents, the Native/Image view displays the images.
- B. If there is hidden content, such as tracked changes or comments, the Native/Image view always displays the hidden content.
- C. The Native/Image view offers a more accurate rendering of original document formats.
- D. The Native/Image view displays complete keyword hit highlighting.
- E. The Native/Image view enables users to download a native copy of the documents.

Correct Answer: AC

QUESTION 4

A Collection Set has been created from data collected for a case.

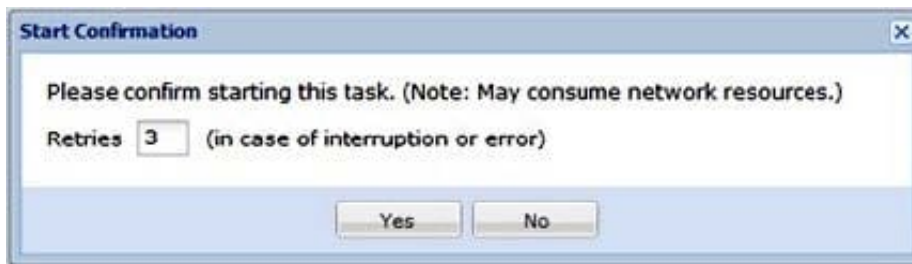

Which steps should an administrator perform in the case to add this source?

- A. Processing > Sources and Pre-Processing > select Add Case Folder Source > browse to the Collection Set location and select the set > proceed with making any additional selections and save
- B. Processing > Sources and Pre-Processing > Add collection set > select the Collection Set > proceed with making any additional selections and save
- C. Collections > Sets > Add collection set > select case name > proceed with making any additional selections and save
- D. Processing > Settings > choose the collection set location under Configure processing parameters and features

Correct Answer: B

QUESTION 5

Refer to the exhibit.

The Enterprise Vault collection task is set to start with the default setting shown in the exhibit. Because the Enterprise Vault storage service has intermittent issues, there are 36 unsuccessful attempts displayed in the logs.

How can the total number of attempts be reduced to less than twelve?

- A. use "Load Collection Template" option and set the "Number of attempts" to 1
- B. check the "Use compression when saving collected data on the destination drive" option on the Destination tab in the task properties
- C. set the property esa.icp.collection.ev.ContentRetriever.RetryCount
- D. reset the retry count in the collection settings

Correct Answer: C
