QUESTION 1

Which two components are required prior to installing the Symantec eDiscovery Platform 8.0? (Select two.)

- A. enable Windows memory dump
- B. .NET Framework 4 is installed
- C. Internet Information Server (IIS) is installed on port 80
- D. the services "Print Spooler" and "Windows Management Instrumentation (WMI)" are running
- E. the Windows Firewall is enabled

Correct Answer: BD

QUESTION 2

An Exchange Server collection task has been run successfully, but the task needs to be rerun because some settings need to be changed.

Which option can be changed after collection has run?

- A. Date range
- B. Custodian assignment
- C. Keywords
- D. Mailboxes to process

Correct Answer: B

QUESTION 3

An administrator has been notified that additional data has been gathered for a case. The loose electronic documents are organized by custodian and have been copied into a source folder which contains data that has been processed.

How can an administrator add the new data to the case?

- A. re-run post-processing on the source
- B. create a new Case Folder Source pointing to the new data
- C. run Discovery against the existing folder to identify the newly added data
- D. collect the new data and process as a new Collection Set

Correct Answer: C

QUESTION 4

Data has been prepared for a case, however it was broadly gathered without any restrictions.

Which two options are available in Symantec eDiscovery Platform 8.0 to restrict data processing via the pre-processing options? (Select two.)

- A. Filter by Date
- B. Filter by File Type
- C. Filter by Keyword
- D. Filter by Source Type
- E. Filter by Author

Correct Answer: AB

QUESTION 5

A customer is notified of the possibility of legal action being taken on an ongoing matter.

Which method should the company use to collect data over the duration of the case?

- A. perform an initial collection of the data and do a high level review
- B. perform an initial collection of the data and do a high level review, then configure a scheduled collection to collect until the matter is resolved
- C. perform an initial collection of the data and do a high level review, then delete the collection if the review is fault free
- D. perform an initial collection of the data and do a high level review, then archive the data for future needs

Correct Answer: B
