**QUESTION 1**

What is the lowest interval you can schedule a backup job to run at?

A. Continuously

B. Daily

C. Every minute

D. Hourly

E. Every 5 minutes

Correct Answer: B

**QUESTION 2**

Which of these statements regarding Replica failover/failback are true?

A. After comitting failback, the failback protective snapshot that saves the pre-failback state of a VM replica is deleted.

B. After commiting failback, replication activities for the VM which you failed back are NOT resumed automatically.

C. When you undo failover, the VM replica is reverted to its pre-failover state, powered off and all changes that have taken place since the VM replica was powered on are deleted.

D. After undoing failover has completed, you will need to reconfigure the replica job before it will start again.

E. It is only possible to failover one VM at a time.

Correct Answer: BD

**QUESTION 3**

Which of these statements regarding Veeam Backup and Replications Powershell Snap-in are true? (Select two)

A. To see a list of available commands use: Get-VBRCommands

B. The PowerShell Snap-In is an optional component.

C. The PowerShell Snap-In is installed by default.

D. The PowerShell Snap-In is available for all editions.

E. A PowerShell script could be run as a post-job activity.

Correct Answer: AB

**QUESTION 4**

Is it possible to use Change Block Tracking (CBT) with Hyper-V?

A. No, for Hyper-V hosts a proprietary filtering mechanism is used.

B. Yes, but only for gen 2 virtual machines using VHDX.

C. Yes, Veeam Backup and Replication installs a file system filter driver on every host.

D. Yes, Hyper-V has built-in Change Block Tracking just like vSphere has.

Correct Answer: C

**QUESTION 5**

Which of these statements are true about Veeam Explorer for Sharepoint? (Select three)

A. Remote BLOB stores are fully supported.

B. The staging Microsoft SQL Server must run on the machine where Veeam Explorer for Sharepoint is installed.

C. Remote BLOB stores are not supported.

D. It is possible to use the Microsoft SQL Server Express 2008 R2 SP1 shipping with Veeam Backup and Replication as a staging server.

E. Remote BLOB stores created with Microsoft Sharepoint Server 2010 (Foundation, Server and Enterprise editions) are supported, if virtualized on VMware or Hyper-V platform.

Correct Answer: ADE
