QUESTION 1

Which of the following is NOT an advantage of Veeam ONE Monitor?

- A. Built in phone home function for better security
- B. Updates are signature based
- C. Automatic problem mediation
- D. Manual or scheduled log analytics

Correct Answer: A

QUESTION 2

Which of the following can help to reduce the amount of traffic that is sent over the network during a second run of a replication job?

- A. Replica mapping
- B. WAN Acceleration for replicas
- C. Re-IP Rules
- D. Replica seeding

Correct Answer: D

https://helpcenter.veeam.com/docs/backup/vsphere/replica_seeding.html#:~:text=Replica%20seeding%20and%20map ping%20are,traffic%20sent%20over%20a%20network.

QUESTION 3

What is the main purpose of the planned failover feature?

- A. Test the VM in a sandbox without impacting the production environment
- B. Proactively switch from running the regular VM to the replica VM
- C. Initiate a disaster recovery procedure when the main site is down
- D. Test a disaster recovery scenario without any downtime on the VM

Correct Answer: B

QUESTION 4

Which previous versions are supported when upgrading directly to Veeam Backup and Replication version 7? (select three)

- A. 6.5
- B. 6.0
- C. 6.1
- D. 6.2
- E. 5.0

Correct Answer: ABE

QUESTION 5

A file on a Windows VM hosted on vSphere is corrupted and must be restored. VMware tools are installed and up to date on the VM. For some reason, the Veeam mount server cannot connect to the VM through the network. Which of the following restore methods provides the fastest restore (RTO)?

- A. Run Veeam file restore wizard and let it restore through VIX.
- B. Start an Instant VM Recovery session and log on into the restored image to copy/paste the file to restore.
- C. It is impossible to restore the file on the VM if the mount server cannot reach it through the network.
- D. Run Veeam file restore wizard and use the "copy to" to download the file locally in a shared folder.

Correct Answer: A

Explanation: According to the Veeam Backup and Replication user guide¹, you can use the File Level Restore wizard to restore files and folders from VM guest OSes that run Windows². The wizard allows you to choose how to access the VM

guest OS: through network or through VIX²VIX is a VMware API that enables programmatic access to virtual machine operations³.

Therefore, if you want to restore a file on a Windows VM hosted on vSphere and the mount server cannot connect to the VM through the network, you can use VIX as an alternative method of access². This will allow you to restore the file directly to its original location without downloading it locally or starting an Instant VM Recovery session.
