QUESTION 1

On October 10, 2018, Huawei released a full-stack full-scenario AI solution. Does Huawei's full stack solution include?

- A. CAN
- B. Application enable
- C. Ascend
- D. MindSpore

Correct Answer: ABCD

QUESTION 2

The background difference method is to use the current post in the image sequence and the background reference model for subtraction, which can realize the detection of moving objects in the image.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 3

In Chinese, the part-of-speech of a word is often not fixed. Generally speaking, words with the same homonym and different shapes have different grammars in different scenes, which brings great difficulties to the part-of-speech tagging.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 4

When taking a selfie, what kind of transformation does the picture displayed on the front lens of the mobile phone need to pass before it can be a real scene image.

- A. Direct mirror
- B. Horizontal mirroring
- C. Spin
- D. Pan

Correct Answer: B

QUESTION 5

Which of the following steps in the MFC extraction process?

- A. Add window
- B. Framing
- C. Fourier transform
- D. Cepstrum analysis

Correct Answer: ABCD

QUESTION 6

Which of the following technologies belong to the application of image segmentation?

- A. Connected domain segmentation
- B. Motion segmentation
- C. Target segmentation
- D. Threshold division

Correct Answer: ABCD

QUESTION 7

What is the word segmentation method in the jieba framework?

- A. cut
- B. lcut_for_search
- C. lcut
- D. cut_for_search

Correct Answer: ABCD

QUESTION 8

Image feature library extraction is a kind of dimensionality reduction idea, can it effectively reduce the amount of image data?

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 9

A complete speech synthesis system process includes?

- A. Synthetic waveform conditions for phonological sequences
- B. Voice to text
- C. Information extraction
- D. Converting a text sequence into a phonological sequence

Correct Answer: ABCD

QUESTION 10

Which of the following is not a common method of text vectorization?

- A. EM
- B. CBOW
- C. BDOW
- D. DM

Correct Answer: A

QUESTION 11

Digital images can be added and subtracted, but they cannot be multiplied and divided.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 12

Named entity recognition refers to recognizing entities with specific meanings in the text. Which ones are mainly included? (Multiple Choice)

- A. Name
 - B. Place name
 - C. Organization name
 - D. Time
 - E. Date
- Correct Answer: ABCDE
-

QUESTION 13

The OTSU algorithm traverses the possible thresholds, and selects the segmentation threshold of the maximum value in the foreground and background regions as the optimal threshold.

- A. Absolute difference
- B. Area difference
- C. Cumulative difference of pixel values
- D. Variance between classes

Correct Answer: D

QUESTION 14

What are the options that are not part of the jieba word segmentation model?

- A. Search engine mode
- B. Precise mode
- C. Random mode
- D. Full mode

Correct Answer: C

QUESTION 15

What are the common color spaces in digital images?

- A. RGB
- B. YUV

C. CMYK

D. HSV

Correct Answer: ABCD
