QUESTION 1

The organization contains the mailboxes shown in the following table.

NAME	Member of	Database
EX1	Site1	Mail1
EX2	Site2	Mail2
EX3	Site3	Mail3

The organization contains the mailboxes shown in the following table.

NAME	Database
User1	Mail1
User2	Mail2
User3	Mail3

You plan to create several public folders that will be accessed by User1, User2, and User3.

You need to ensure that users can access all the public folder content if a single server or network link fails.

What should you include in the solution?

- A. a database availability group (DAG)
- B. shadow redundancy
- C. multiple public folder mailboxes
- D. multiple public folder migration endpoints

Correct Answer: A

QUESTION 2

Overview

General Overview

Contoso, Ltd. is a national freight company in the United States. The company has 15,000 employees.

PhysicalLocations

Contoso has a main office in Houston and 10 branch offices that each contains 1,000 employees.

ExistingEnvironment

Active Directory and Microsoft Exchange Server Environments The network contains an Active Directory forest named contoso.com. The forest contains one root domain named contoso.com and 10 child domains. All domain controllers run

Windows Server 2019.

The forest has Active Directory Certificate Services (AD CS) and Active Directory Federation Services (AD FS) deployed.

You have a hybrid deployment of Exchange Server 2019 and Microsoft Office 365.

There are 2,000 user mailboxes in Exchange Online.

Each office contains two domain controllers and two Mailbox servers. the main office also contains an Edge transport server.

The organization contains 100 public folders. The folders contain 80 GB of content. All email messages sent to contoso.com are delivered to Exchange Online. All messages sent to onpremises mailboxes are routed through the Edge

Transport server. Advanced Threat Protection (ATP) is enabled and configured for the Office 365 tenant.

NetworkInfrastructure

Each office connects directly to the Internet by using a local connection. The offices connect to each other by using a WAN link.

Requirements

Planned Changes

Contoso plans to implement the following changes:

1. or all new users in the on-premises organization, provide an email address that uses the value of the Last Name attribute and the first two letters of the First Name attribute as a prefix.
2. ecommission the public folders and replace the folders with a Microsoft 265 solution that maintains web access to the content.

Technical Requirements

Contoso identifies the following technical requirements:

1. All email messages sent from a SMTP domain named adatum.com must never be identified as spam.
2. Any solution to replace the public folders must include the ability to collaborate with shared calendars.

Security Requirements

Contoso identifies the following security requirements:

1. The principle of least privilege must be applied to all users and permissions.
2. All email messages sent from an SMTP domain named com to contoso.com must be encrypted.
3. All users must be protected from accessing unsecure websites when they click on URLs embedded in email messages.

4. If a user attempts to send an email message to a distribution group that contains more than 15 members by using Outlook, the user must receive a warning before sending the message.

Problem statements Recently, a user named HelpdeskUser1 erroneously created several mailboxes. Helpdesk1user1 is a member of the Recipient Management management role group. Users who have a mailbox in office 365 report that it takes a long time for email messages containing attachments to be delivered.

HOTSPOT

You need to configure the environment to support the planned changes for email addresses. How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

 -Name 'UserMailboxes'

-RecipientFilter {(RecipientType -eq 'UserMailbox')}

-EnabledEmailAddressTemplates '

Correct Answer:

 -Name 'UserMailboxes'

-RecipientFilter {(RecipientType -eq 'UserMailbox')}

-EnabledEmailAddressTemplates '

References: <https://docs.microsoft.com/en-us/powershell/module/exchange/email-addresses-and-addressbooks/new-emailaddresspolicy?view=exchange-ps> <https://docs.microsoft.com/en-us/Exchange/email-addresses-and-address-books/email-addresspolicies/email-address-policies?view=exchserver-2019>

QUESTION 3

Your company has a Microsoft Exchange Server 2019 organization.

You are auditing the Litigation Hold on the mailboxes of the company's research and development department.

You discover that the mailbox of a user named User1 has a Litigation Hold enabled.

You need to discover who placed the Litigation Hold on the mailbox of User1, and when the Litigation Hold was enabled.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct

selection is worth one point.

- A. From the Exchange admin center, run an In-place eDiscovery and Hold report.
- B. From PowerShell, run the Get-Mailbox cmdlet.
- C. From the Exchange admin center. run a per-mailbox Litigation Hold report.
- D. From PowerShell, run the Get-MailboxStatistics cmdlet.

Correct Answer: CD

QUESTION 4

Your network contains an Active Directory forest. The forest functional label is Windows Server 2012 R2. The forest contains a Microsoft Exchange Server 2019 organization. Users access their mailbox by using Microsoft Outlook 2016.

You purchase a Microsoft 365 E5 subscription.

You plan to move 20 mailboxes to Exchange Online.

From Exchange Online, you attempt to perform a remote move migration. When you are prompted to select the users, you discover that there are no users to select. You need to ensure that you can migrate the users to Exchange Online by

using a remote move migration.

You need to ensure that you can migrate the users to Exchange Online by using a remote move migration.

What should you first?

- A. Create a new certificate.
- B. Upgrade the forest functional level.
- C. Prepare the Active Directory schema.
- D. Implement Active Directory synchronization.

Correct Answer: D

QUESTION 5

DRAG DROP

You have a Microsoft Exchange Server 2019 organization.

Two Edge Transport servers provide email hygiene.

You configure anti-spam filters to redirect email messages identified as spam to a quarantine mailbox.

You open the quarantine mailbox in Microsoft Outlook 2019 and discover that the from field of all quarantined messages shows the postmaster address.

You need to ensure that the quarantined messages can be sorted by using the original sender address.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Create a new Outlook form in Notepad.	
Edit the view in Outlook to include the required columns	
Install a form in Outlook.	
Run the Set-ContentFilterConfig cmdlet and specify the -OutlookEmailPostmarkValidationEnabled parameter.	
Edit the IPM.Note form in Outlook.	

Correct Answer:

Actions	Answer Area
	Create a new Outlook form in Notepad.
	Install a form in Outlook.
	Edit the view in Outlook to include the required columns
Run the Set-ContentFilterConfig cmdlet and specify the -OutlookEmailPostmarkValidationEnabled parameter.	
Edit the IPM.Note form in Outlook.	

Create a new Outlook form in Notepad.

Install a form in Outlook.

Edit the view in Outlook to include the required columns

QUESTION 6

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You create a new safe links policy and apply the policy to finance department users.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

References: <https://blog.netwrix.com/2019/01/24/make-the-most-of-exchange-online-advanced-threat-protection/>

QUESTION 7

You have a Microsoft Exchange Server 2019 organization.

You need to prevent credit card information from being emailed outside of the organization. Users must be informed of any potential breaches before sending email.

What should you create?

- A. a journal rule
- B. a retention policy
- C. a retention tag
- D. a data loss prevention (DLP) policy

Correct Answer: D

References: <https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

QUESTION 8

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to

the Junk Email folder.

Problemstatements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to resolve the issue for the customer service department users.

What should you modify?

- A. a transport rule
- B. the Send connector to the Internet
- C. the tarpit interval
- D. the global throttling policy

Correct Answer: D

QUESTION 9

HOTSPOT

You have a Microsoft Exchange Server 2019 organization that has the mailboxes shown in the following table.

Name	Litigation Hold
User1	Enabled
User2	Disabled
User3	Disabled
User4	Enabled

You have the distribution groups shown in the following table.

Name	Type	Hidden from the global address list (GAL)
Group2	Distribution	No
Group3	Dynamic distribution	Yes

Email messages sent within the organization are shown in the following table.

Subject	Sender	To: Recipients	Bcc: Recipients
Fabrikam Meeting	User1	User3	Group2
Litware Meeting	User2	User3	Group3
Contoso Meeting	User1	User4	Group2

For each of the following statements, select Yes if the statements is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
When you perform an eDiscovery search on the User1 mailbox by using a keyword of Fabrikam Meeting, you can view the membership of Group2 in the search results.	<input type="radio"/>	<input type="radio"/>
When you perform an eDiscovery search on the User2 mailbox by using a keyword of Litware Meeting, you can view the membership of Group3 in the search results.	<input type="radio"/>	<input type="radio"/>
When you perform an eDiscovery search on the User4 mailbox by using a keyword of Contoso Meeting, you can view the membership of Group2 in the search results.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
When you perform an eDiscovery search on the User1 mailbox by using a keyword of Fabrikam Meeting, you can view the membership of Group2 in the search results.	<input checked="" type="radio"/>	<input type="radio"/>
When you perform an eDiscovery search on the User2 mailbox by using a keyword of Litware Meeting, you can view the membership of Group3 in the search results.	<input type="radio"/>	<input checked="" type="radio"/>
When you perform an eDiscovery search on the User4 mailbox by using a keyword of Contoso Meeting, you can view the membership of Group2 in the search results.	<input type="radio"/>	<input checked="" type="radio"/>

References: <https://docs.microsoft.com/en-us/exchange/policy-andcompliance/ediscovery/ediscovery?view=exchserver-2019>

QUESTION 10

You have a Microsoft 365 subscription.

A safe attachments policy that uses Dynamic Delivery is applied to all recipients who match your SMTP domains.

You need to prevent attachments from being scanned when internal users send email to one another.

What should you do?

- A. From the Security and Compliance admin center, modify the safe attachments policy.
- B. From the Security and Compliance admin center, modify the Service assurance settings.
- C. From the Exchange admin center, create a transport rule.
- D. From the Exchange admin center, modify the malware filter.

Correct Answer: C

QUESTION 11

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

TechnicalRequirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to recommend a procedure for closing the Brussels office that meets the technical requirements.

What should you recommend?

A. In the main office, deploy an Exchange Server 2016 server that has the Unified Messaging role installed, and then move the mailboxes from the Brussels office to the new server.

B. Deploy a Microsoft Skype for Business 2019 server to the main office, and then move the mailboxes from the Brussels office to an Exchange Server 2019 server in the main office.

C. Implement a new mailbox database on an Exchange Server 2019 server in the main office, and then move the mailboxes from the Brussels office to the new mailbox database.

D. Implement a new database availability group (DAG) that contains the server in the Brussels office and a new Exchange Server 2019 server in the main office, and then create a mailbox database copy on the new server in the main office.

Correct Answer: C

References:

<https://docs.microsoft.com/en-us/exchange/architecture/mailbox-servers/manage-mailbox-moves?view=exchserver-2019>

QUESTION 14

You have a Microsoft 365 subscription that uses a default domain named contoso.com.

Users report that email messages from a domain named fabrikam.com are identified as spam even through the messages are legitimate.

You need to prevent messages from fabrikam.com from being identified as spam.

What should you do?

- A. Modify the IP Allow list of a connection filter policy.
- B. Edit the default mail flow rule to bypass the spam filter.
- C. Create a new remote domain.
- D. Create a new malware filter policy.

Correct Answer: A

QUESTION 15

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a new Microsoft 365 E5 subscription.

You need to identify which administrator deleted mailboxes during the last two days.

Solution: From Exchange Online PowerShell, you run New-AdminAuditLogSearch.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A
